OUR SEED WAREHOUSE. LOADING OUT FOR THE DEPOTS." FROM A PHOTOGRAPH

To Seed Buyers:

There are three classes of Seed Catalogues.

One class caters to the patronage of those who are misled by overdrawn pictures and statements that are deliberately untrue.

Another class takes advantage of the fears of those who, through their natural desire to secure the best seeds, will pay fancy prices for what often proves to be very ordinary stock.

There is yet another class which seeks the trade of those who want the best seeds possible to procure and are willing to pay a reasonable price for them. Another class takes advantage

reasonable price for them.

To this class our Catalogue belongs. Our seeds we believe to be as good as can be obtained

anywhere.
Our descriptions are brief
and accurate.

Our illustrations are true to nature

Our prices are reasonable.

We trust that our efforts to simplify the task of selection and dignify the sale of seeds will meet with the approval of intelligent purchasers.

Respectfully,

Northrup, King & Co.

Minneapolis, Minn., Jan. 1, 1898.

Modes of Ordering and Sending Money.

Wodes of Ordering and Sending Woney.

SEEDS BY MAIL. Please remember that our prices include PREPAYMENT OF POSTAGE by us on all Seeds ordered by the PACKET, OUNCE, POUND, PINT OR QUART; also on PLANTS and BULBS. Deduct 8 cents per pound from postpaid prices on Seeds ordered sent by Express or Freight.

SEEDS BY EXPRESS OR FREIGHT. We deliver Seeds to any Express or Railroad Company in Minneapolis, the purchaser to pay transportation charges upon receipt of goods. The Poeduct 8 cents per pound from postpaid prices on Seeds ordered sent by Express or Freight. When possible, give full shipping instructions. In the absence of these particulars, we will use our best judgment.

No charge for Bags, Boxes or Cartage on Seeds bought at prices herein named.

PURCHASING BY EXPRESS. Express offices have now purchasing departments in all their offices. If you wish to order goods from us to be sent by Express, ask for a purchasing order blank at any Express Office, and it will be supplied and forwarded by them without extra charge, other than the usual rates for returning goods. NAME, ADDRESS, ETC. When ordering, give name and full address. Many orders reach us every season in which the Name or Post Office Address is lacking. It is of course impossible for us to fill these orders until they are identified.

which the Name of Post Omce Ad are identified. HOW TO SEND MONEY. M Registered Letter. If your order at Stamps received the same as Cash. ND MONEY. Money can be sent safely either by P.O Order, Bank Draft. Express Order or If your order amounts to \$1.00 or more, it is best to send by one of the above methods. Postage

THE PARTY OF THE P "A Bucking Broncho."

In 1895 we sent out as a premium, a fine lithog phic reproduction of one of C. H. Russell's pictures entitled "A Bucking Broncho." We have a few hundred of these left without wording of any kind, and as long as any remain, a copy will be sent FREE as a premium on orders for Seed in packets, to the amount of \$1.00, if requested, or will be sent postpaid to any address on receipt of 25 cents.

Brimers. Northrup, King & Co.'s

There is a great demand for practical instruction on Farming and Gardening subjects. Enough books are written, but they do not, as a rule, touch the spot.

They say too much; they tell too little. Farmers do not have time to wade through page after page of dry, impractical matter; to "search the haystack for the needle." They want information, and they want it in such shape that they can apply it to their own needs.

Barnestly desiring to be identified with that which is highest and best in progressive agriculture, we have adopted a plan of issuing a series of Primers on agricultural subjects, written for us by the best authorities on the matters of

a plan of issuing a series of Primers on agricultural subjects, written for us by the best authorities on the matters of which they treat.

These Primers will appear from year to year in pamphlet form, printed on good paper, finely illustrated and of uniform size, so that if desired, they may be bound in book form.

Primer No. 1 is entitled "Shaw's System of Pasturing Sheep." It is written for us by Thomas Shaw, Professor of Animal Husbandry at the Minnesota Agricultural College. It will be of value to every grower of live stock and of especial importance to those interested in sheep. For hurther notice of Primer No. 1 see page 26.

These Primers will not be sold. They will be given to customers who purchase Seeds from this Catalogue to the value of fifty cents, and who ask for them when ordering.

SPECIAL NOTICE. Do not overlook our folder, "The Farmer's Garden." (See page 16.) It is sent free to our customers who request it when ordering.

Vegetable Seeds.

EVERY VARIETY WE LIST IS GOOD.

MR. B. L. GRANT Hudson, Wisconsin,

"In reply to your inquiry: I had this year about 200 acres into vegetable garden. Most of the seeds I bought were from you and they proved, as usual, entirely satisfactory.

I am very pleased with your stock of Holland Cabbage. The seed for eight acres was from you; that for fonr acres was from another firm. Yours was splendid. The Cabbage on the other four acres was not good and they rotted very badly. I regard the Holland as the coming Cabbage. Shall plant twenty acres of it next year, and shall want your seed exolusivelu.

In the past twelve years I find I have bought from your house over 3,000 lbs. of Onion Seed, large quantities of Cabbage and other seeds, and they have always proven uniformly good, both as respects purity of stock and strong germination."

B. L. GRANT.

To Our Customers.

N making up our List, it has been our aim to include only those Seeds which possess REAL MERIT, and to describe and illustrate them TRUTHFULLY.

Attention, too, is called to the fact that on leading varieties, we mention the NUMBER OF SEEDS TO BE FOUND IN OUR PACKETS.

As space permitted, we have printed a few of the many letters we are almost daily receiving from our customers, expressing the satisfaction our Seeds have given them.

It affords us great pleasure to receive such generous words of appreciation, but we also want our customers to feel that We are at all times ready to entertain any just cause for complaint.

We will consider it a favor, if each one who buys seeds from this Catalogue, whether their order be large or small, will inform us as to how they were pleased with them.

Respectfully,

NORTHRUP, KING & CO.

MR. ALEXANDER HANNAH. Hayes, Texas, Aug. 16th. 1997.

"The seeds I have purchased from von have alway given full satisfaction. Your seeds are modestly praised through modest claims, but they stand the test of time, Good seeds are like a true gentleman, they do not require slang praise and false flattery to give them reputation. Proof has been ample of your sincerity in the true worth of your seeds."

ALEXANDER HANNAH.

Southampton, N. Y., Aug. 16, 1897. "It would be neither grateful nor just to fail to add that the Northrup seed concern has served me not only as long as Jacob served for Leah, but as faithfully. This unsolicited acknowledgment simply expresses my obligation for their invariably prompt and honest dealings with a customer who buys only in small quantities." W. F. HOWELLS.

Your CALIFORNIA WONDER BEAN is the GREATEST YIELDER I have ever seen. I see that one of your customers grew 864 BEANS FROM ONE VINE. I HAVE JUST SHELLED THE BEANS FROM ONE STALK AND HAD 900 GOOD BEANS.

L. R. CROCKER, Minn.

The California Wonder or Improved Tree is easily the heaviest yielding Bean known. It is a field variety. The Seed resembles the well known "Navy" and on account of its whiteness and small size commands the highest price in all markets. It has the additional merit of being pure stock. It is to us a source of constant wonder that Bean growers, otherwise intelligent should plant mixed seed, as mixed stock always sells at from 25 to 50 per cent less than straight stock. A few cents extra expended on the seed means many dollars in the crop. 12 quarts of the California Wonder Bean will plant an acre. Price, large Pkt., 10c; Qt., 40c; postpaid. By express or freight, Qt. 20c; Peck, 60c; Bu., \$2.00; 10 bu. @\$1.75.

For Mangel Wurzel, (Stock Feeding Beet), See Page 29. For Sugar Beet, (Finest Strains), See Page 27.

"I want to let you know that the Washington Wakefield Cabbage surpassed any other variety of Early Cabbage we had here. We took the first to market July 15th. Receive my most sincere respects in promising you my full order for seeds next year."

Our Packets of Cabbage contain on an average about 1000 Seeds. One ounce for a bed of forty feet will produce about 2000 plants.

The above illustration is from a photograph of the interior of one of the 17 large greenhouses owned by Mr. Fred Busch of Minneapolis.

Mr. Busch has 75,000 feet of glass and is one of the largest growers of vegetables under glass in the

His specialties are Cucumbers, Tomatoes, Radishes and Lettuce. These he sells not only throughout the Northwest, but ships largely to Chicago, St. Louis and other leading markets. The following statement from a man like Mr. Busch means a great deal:

Northrup, King & Co., Minneapolis, Minn.

Gentlemen:-You ask me if I have any objection to your referring gardeners to me, as to the reliability of the seeds I have had from you. In reply would say that I not only have no objection, but on the contrary, it will afford me very great pleasure if I can be of service to you in this way.

I have purchased the greater part of my seeds from your house for the last fourteen years, and speak from long experience, when I say, they have given perfect Can one say more? satisfaction.

Minneapolis, Oct. 16, 1897.

Yours very truly,

(Signed) FRED BUSCH.

The Lupton. Considered by Mr. Lupton, the well known cabbage specialist, to embody all the points to be desired in a late cabbage. It is a selection from Excelsior Flat Dutch, and a little earlier. Color dark bluish green, Stem short and strong, heads large, but not coarse. An excellent keeper. Pkt. 5c; Oz. 20c; ¼ 1b. 50c; Lb. \$1.75.

Bridgeport Drumhead. Late. head large, very solid, good shipper. Pkt. 5c; Oz. 20c; ¼ 1b. 50c; Lb. \$1.50.

Louisville Drumhead. Popular in the south, Pkt. 5c; Oz. 20c;

HOLLAND CABBAGE.

(The Genuine Stock.)

In some important particulars, this is the most remarkable Cabbage yet produced. In fact, it well illustrates the truth, that "merit will win," in that while it was introduced only about three years ago, it has already become the favorite sort with those who have had the true stock. The heads, which are very solid and deep, are of medium size averaging about 8 lbs. in weight; in color they are entirely distinct; in point of quality they have no superior, and they keep better than any other sort, the heads being as solid and perfect when taken up in the spring as when put away in the fall. At that time no cabbage will sell beside them even at one-half the price. Large pkt. 5c; oz. 30c; ½ lb. \$3.00.

Holland Cabbage.

CELERY, ETC.

Our Packets of Celery contain on the average about 6,000 Seeds. - One Ounce of Seed will produce about 3,000 Plants.

Kalamazoo. Named and introduced by us 1888, and we have never seen a better Celery since that time, when we sent it out as the best celery grown. Not a self-blanching variety, but well repays the slight extra labor in treating it. Perfectly solid, beautiful cream color.

Crisp and nutty in flavor.. 10c 30c 75c \$2.75

CAULIFLOWER. One Ounce of Seed will produce 1,000 Plants.

One Ounce of Seed will produce 1,000 Plants.

Northrup, King & Co.'s Model. Several years ago we received from Denmark a sample of cauliflower; the letter accompanying it claimed it to be a superior strain. We planted this in our trial grounds, and after comparing it carefully with all other early varieties, we concluded that it was fairly entitled to be called the best cauliflower on the grounds. The very earliest sort, while in solidity of head and purity of color we have never seen its equal. It is the best for early planting; best also for late planting on account of its close growing habit, which allows many more plants to be grown on a given area than of the late spreading sorts. Pkt., 20c; ½0z., \$1.25; 0z., \$2.00; ½1b., \$7.00; 1b., \$25.00. Try the Model Cauliflower.

"Your Model Cauliflower is the best in the world, and I had seed from several firms. I had Cabbage and Cauliflower in market before any one else, and that is saying a good deal."—WILLARD GOOD, Sundance, Wyo.

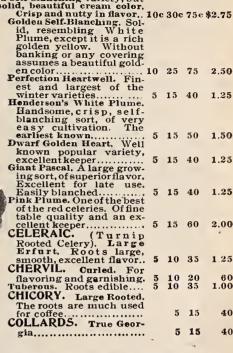

Henderson's Snowball. Excellent for both early and late planting. Grown from stock seed obtained from originators. Pkt., 15c; ¼ oz., 60c; ½ oz., \$1.00; oz., \$1.75; ¼ b., \$6.00; b., \$20.00.

Extra Early Dwarf Erfurt. Short stem. very fine stock. Pkt., 15c; ½ oz., 75c; oz., \$1.25; ¼ b., \$5.00; b., \$15.00. Early Erfurt. Pkt., 10c; oz., \$1.00; b., \$7.00.

Walcheren. Very late and hardy. Pkt., 10c; oz., 35c; ¼ \$\mathcal{1}\$\$ \$1.00.

Autumn Giant, Large, late. Pkt., 10c; oz., 35c; ½ b... \$1.00.

The Most Wonderful Green-house in the World.

At first sight, the reader will naturally inquire, what can there be about this small, rudely constructed affair, to entitle it to be called, "The most wonderful greenhouse in the

"The most wonderful greenhouse in the world"?
We think, however, that the few facts our space allows us to present, will justify that title and interest our readers.

title and interest our readers.

The greenhouse, of which our illustration is a direct reproduction, is situated in Upper Geyser Basin, Yellowstone National Park, Wyoming. The altitude at this point is 7400 feet above sea level, and there is not head to the search of the search our readers. ls 1400 feet above sea level, and there is not a month in the year that ice does not at some time form. Nev-ertheless, this green-house is heated without fire, and produces veg-etables of the finest

Inc, and produces vegetables of the finest from the planting of the seed, than any other greenhouse in the world.

The simple facts are these: The greenhouse is built over a running stream, which comes from a six inch hole in the formation, at a temperature of 195° F. This not only at all times, furnishes ample heat, but the vapor with which the ed from dry seed came up in two days; Cucumber in three days; Radishes in four days. Lettuce, twenty-eight days after planting, measured twenty-two inches across. Cucumbers were gathered in thirty-four days after planting, and yielded almost beyond belief.

We are indebted to Mr. W. P. Lowe, manager of the hotel at Upper Geyser Basin, and the originator and builder of this unique greenhouse, for the above and many other interesting particulars about it. We have also learned that Mr. Howe, very kindly, (and without our knowledge.) caused a large sign to be painted and prominently displayed on the premises, bearing the words: "THE SEEDS USED IN THIS GREENHOUSE ARE FROM NORTHRUP, KING & CO., SEEDSMEN, MINNEAPOLIS."

Over four thousand people visited this curious vegetable house during the season of 1897, and with one accord pronounced it one of the greatest wenders of the Yellowstone National Park.

THE ROCKY FORD MUSK MELON.

The Melon known on the "bills of fare" of the leading hotels and restaurants of America as the "Rocky Ford Canteloupe" takes its name from the little town of Rocky Ford, Colorado, which has become as famous for its melons as is Baltimore for its oysters. The shipping of these melons has reached such proportions as to cause it to become the leading industry of the town, thousands of crates being annually forwarded to the principal cities of the United States.

The reason for the wide-spread popularity of these melons is two-fold. First, its superb table qualities, being firm, sweet, and remarkably solid. Second, its wonderful shipping qualities, which en-

Northrup's Yellow Meated Japan,

able it to be carried great distances, and yet arrive in first-class condition for market. The fruit is of medium size, oval shaped, heavily netted and very solid. The flesh is green. thick and juicy.

It is very early and wonderfully productive. No doubt there will be a very large demand for this variety the coming season, and inferior stock will be put upon the market.

We obtained our seed at high cost direct from Rocky Ford. Those who purchase their seed from us can fully rely on securing the genuine stock.

Pkt. 15c., oz. 30c. 1/4 D. \$1.00, Lb. \$3.00.

WATER MELON.

Our Packets of Water Melons contain on the average about 100 Seeds.

Me'on Peach. The fruit is about the size of a large peach, oval shaped, and of a bright orange color, somewhat russeted. For sweet pickles, pies, or preserving, they are superb; a few pieces of sliced lemon or a little lemon essence adds to theirflavor, and is usually desirable. They are easily cultivated, wonderfully productive and can be used in every way in which can be used in every way in which you would use a peach, except that they are not usually liked raw; although some consider them excellent simply sliced with a little sugar on. Pkt. 5c; Oz. 30c.

a little sugar on. Pkt. 5c; Oz. 30c.

Kentucky Wonder. We introduced this melon in 1886. At that time we thought it the best melon; in 1898 we think the same. One just cause for criticism on many of the new melons that have of late been sent out, is that for the most part they have been, at the best, slightly improved strains of some old and well-known sort. This cannot be said of Kentucky Wonder, It is distinct and the melon itself proves it. In shape it is oblong, attaining a good size, skin dark green and beautifully marked. Flesh a beautiful rich scarlet color, crisp, rich, sugary, always firm and solid, never mea'y or tough. Kentucky Wonder has won first prize over such well-known and popular sorts as Ironclad, Cuban Queen, Kolb's Gem, etc. Large Pkt. 5c; Oz. 10c; ¼ lb. 20c; 1 lb. 60c.

We consider our Minnesota Grown Onion Seed the Finest in the World. We do not believe that any seed grown will produce Onions that will Ripen as Early, Keep as Long, or produce as small a percentage of "thick necks" or "scullions."

onions.

Our Packets of Onion contain on the average about 1,500 Seeds. One ounce will sow 100 feet of drill; 4 to 5 lbs to the acre are required for large Onions, 50 to 60 lbs to the acre for sets or pickles.

"I made a mistake in planting the Red Wethersfield Onion I got from you. I put the seed in thick, allowing for bad seed, a BUT THEY ALL CAME UP, and gave me the trouble of thinning them out. It is a MARVELOUS ONION."—ANGUS MC-DOWELL, Wausaukee, Wis.

"Your Red Wethersfield Onions were the finest I have ever grown."-D. H. TRACY. Effington, S. D.

In order to impress upon Onion Growers the great care we have exercised in the selection of this onion, we attach the following statement from our Mr. Charles C. Massie who was entrusted by us with the selection: and planting of the bulbs from which our Globe Wethersfield Onion Seed was this year produced.

MR. MASSIE'S STATEMENT.

MR. MASSIE S STATEMENT.

I certify that I personally attended to the selection and planting of the Globe Wethersfield Onion, nd that the one is not shown in the accompanying illustration correctly represents in shape and size all the bulbs from which the crop of seed was produced. I also attended to the threshing, cleaning and testing of said seed, and believe it represents as pure and eelect a lot of Onion Seed as is possible to produce.

CHARLES C. MASSIE. Minneapolis, Dec 20th, 1897.

average specimen of Northrup, King & Co.'s GLOBE WETHERSFIELD ONION

and fairly shows its natural size and shape.

This is really a Red Globe Onion of the finest and most select type and we believe it to be unequalled by any stock in existence. We have called it N. K. & Co's Globe Wethersfield in order to distinguish it from all other stocks of Red Globe Onion from which it differs, not only in purity of stock and perfection of shape, but in earliness, productiveness and beauty of color. The outer skin possesses that lustre and richness of color so desirable and yet so often lacking in Red Globe stock. We have been led to pay special attention to this onion, as we believe Globe Shaped Onions to be the onion of the future. They are most attractive in appearance, most economical in use, and usually they command the highest price. They are more profitable than flat varieties to grow, as they occupy no more room in the row, but weigh more and measure better. Price: large pkt. 10c, oz. 25c, ½ lb., 70c, lb. \$2.25, lb.lbs., @ \$2.00.

CAUTION: For the protection of our customers and ourselves, every package of the onion sold whether it be large or

> small, will bear a fac simile of our trademark as shown at lower right hand corner of this page.

Field of N. K. & Co.'s Globe Wethersfield Onions. [From a Photograph].

ONIONS.

PRIZETAKER. This onion has become a great favorite on account of its large size and great solidity. It is perfectly globe-shaped, with bright straw-colored skin; the necks are very small and the onions always ripen up hard. An excellent keeper, exceedingly fine flavor. grows to an enormous size. Onions weighing 5 lbs., having been grown from seed the first year. One of our Minnesota customers reports that he sold during the past season a large portion of his crop at \$1.25 a bushel, and at a time too when ordinary onions were going slowly at 30 cents a bushel. Prizetaker is the favorite variety for transplanting. On account of its being somewhat late, it is not recommended for general planting in the extreme north. Large pkt., 5 cts.; oz., 15 cts.; ¼ lb., 40 cts.; lb., \$1.30. postpaid.

BERMUDA ONIONS. These onions grow to an immense size and are of beautiful form. The skin is very thin; flesh white, fine grained, of mild and pleasant flavor. It will grow an onion from one to one and a half pounds from seed, but to attain the full size the bulb should be set out the following spring. White or red, each, per pkt, 10 cts.; Oz., 20 cts.; ½ 1b., 50 cts.; 1b., \$1.50, postpaid.

MAMMOTH SILVER KING. We hardly know which to commend the most, its large size, symmetrical appearance and beautiful silvery flesh or its sweetness, tenderness and mild flavor. These qualities make it the best for exhibition. Not recommended for extreme north. Large pkt. 5c; oz. 15c; 1/4lb. 50c; 1/81.50 postp'd.

EXTRA EARLY WHITE QUEEN. Remarkable for its earliness and mild flavor. In size it is very small. Much used for pickling.

WHITE BARLETTA. This variety is most distinct on account of its great earliness. It is earlier than the White Queen. It is of a beautiful waxy white color and grows 1½ inches in diameter and ¾ of an inch thick, with finely formed bulbs, slightly flattened at the top. Its earliness will highly recommend its use as a substitute for onion sets. An excellent pickling sort. Post-

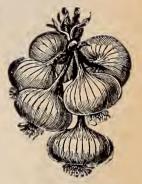

THE FARMER'S GARDEN.

Farmers as a class do not have good gardens. This is doubtless owing to the rush of work in the spring, and to the fact that hand labor is expensive and not always available.

MR. A. K. Bush, Horticulturist, with the Minnesota Farmers' Institute, also a practical gardener and farmer, has at our request, prepared an illustrated plan of the Farmers Garden, he is advocating. It is the most practical thing of the kind ever brought to our attention,

and does away very largely with hand labor. MR. BUSH'S plan provides for a Fruit and Vegetable Garden that may be easily cared for with the aid of a horse and ordinary farm cultivator. It is illustrated by a diagram, and instructions are given as to culture, rotation, etc. Every farmer, in fact every one who has or wants a garden, should have this folder, entitled, "THE FARMER'S GARDEN." It is Free to those who send us an order and ask for it.

Scientists make the startling assertion that lung and kidney ailments are rapidly increasing among the farmers of America, and assign as one of the principal reasons, the lack of retable food in sufficient variety.

Extra Early White Queen Onion.

==THE==

IMPORTANCE OF USING NORTHERN GROWN ONION SETS.

Onion Sets are planted in order to obtain onions earlier than they can be had from seed. It follows therefore that Northern Grown Onion Sets will produce onions earlier than southern grown sets. In addition to this our sets are incomparably superior to ordinary stock, being of small size, sound and free from trash. PRICES subject to market changes.

N. K. & Co.'s White Silverskin Onion Sets.

Top Onion Set.

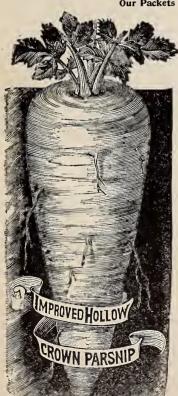

PRICES (subject to market changes). If wanted by mail add to cents a quart for postage. Pk's, at bu. rates.

Once set out and established, Egyptian sets come up year after year. Will stand any climate and furnish the earliest green onions.

PARSLEY.

Our Packets of Parsley contain on the average about 2000 Seeds.

Champion Moss Curled Parsley. For garnishing; no variety is more attractive when well grown; resembles a tuft of finely curled moss, is hardy and slow in running to seed. Pkt., 3c; oz., 7c; ¼1b., 20c; 1b., 60c;

postpaid.

Emerald. Distinct in appearance from any of the other varieties, being of a lighter and more brilliant shade of green. The plant is of dwarf habit, with leaves finely cut and very curly. To growers for the market as well as for private gardens we commend this sort. Pkt., 3c; oz. 7c; ¼1b., 20c; 1b., 70c.

Extra Double Curled. A fine dwarf variety, beautifully curled; excellent for garnishing. Pkt., 3c; oz., 7c; ½1b., 20c; 1b., 50c.

Plain. The leaves of this sort are plain; it is hardier than the curled variety. Pkt., 3c; oz., 7c; ½1b., 15c; 1b., 50c.

Hamburg or Turnip-Rooted. A fleshy-rooted kind; the roots used for flavoring soups. Pkt., 3c; oz., 7c; ½1b., 15c; 1b., 50c; postpaid, Emerald,

PARSNIP.

Our Packets of Parsnip contain on the average about 1500 Seeds.

Hollow Crown. We believe this is the finest stock of Parsnip that can be procured. The roots run of uniform size, and are smooth. The growing taste for this delicious vegetable will make this improved strain particularly desirable. Pkt., 3c; oz., 7c; ¼ 1b., 15c; 1b., 50c.

Long Smooth. A fine flavored variety. Pkt., 3c; oz., 7c; 1/4 lb., 12c;

Early Round. An early variety, but of small size. Pkt., 3e; oz., 7e; ¼ lb., 15e; lb., 50e.

To Market Gardeners.

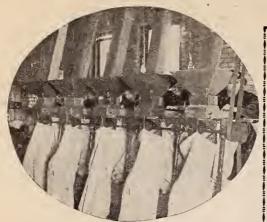

Market gardeners as a rule send away from home for their seeds.

their seeds.

Our orders from distant cities are increasing in number and size each year, and this of course gives us great satisfaction. We are best pleased however to be able to state, that we have and hold the trade of the

Moss Curled Parsiey

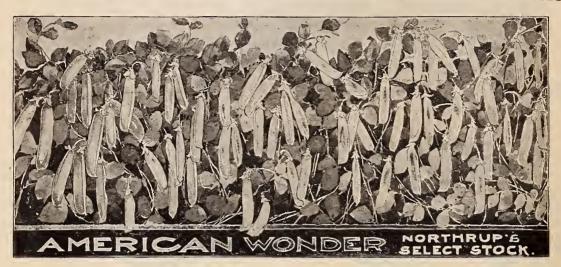

A Corner of our Picking Room. From a Photograph.

SEED PEAS.

Northern Grown Seed Peas are earliest, hardiest, most productive, and we make a SPECIALTY of them. The level fields of the Northwest produce crops of a uniformity unknown in other pea growing sections. Our crops are thoroughly "roguged" while growing. Samples are fine, free from the pea weavil and thoroughly handpicked.

PRICES. In order to encourage purchases from large planters who live at distant points, we have made exceptionally low prices. Freight rates named on application. Note also, that pints are supplied at quart prices. Pecks and half bushels at bushel prices. No charge for bags. Do not overlook that as our quart prices include postage, 15 cents a quart—7c a pint should be deducted if sent by express or freight at purchaser's expense.

FIRST EARLY PEAS.

Our Packets of Peas contain on the average about 150 Seeds.

One quart will plant about 100 feet of drill. One and one-half bushels to the acre.

A WORD ABOUT PRICES.

In purchasing an article of clothing, purchasers can examine its texture, and satisfy themselves as to its quality, and there are tests which will determine the value of every article of merchandise Except SEEDS, for which the only test is that of time. Frequent advantage is taken of this by seedsmen, to ask unreasonable prices for their seeds. and when asked why their prices are higher than those of other firms, their reply is, "Beware of Cheap Seeds." etc. We say too BEWARE OF CHEAP SEEDS, whether sold at ridiculously low or ridiculously high prices, for there has been as much humbuggery in the one as in the other. By GOOD SEEDS at Fair Prices, we mean the Best Seeds obtainable at prices that are fair to the purchaser and to the seller. fair to the purchaser and to the seller.

"GOOD SEEDS NOT PART OF THE TIME, BUT ALL THE TIME."

"I have purchased the greater part of my seeds of your house for more than 12 years, and they have given me every satisfaction.

It is worth a great deal to a market gardener to know where he can get good seeds, not part of the time, but all the time."

Minneapolis, Nov. 15, '97. NELSON REEVES.

Mr. Reeves is one of the principal gardeners of Minneapolis. In addition to his out door crops he owns and operates 7 large Green Houses, all of which are devoted to vegetables, except his Pansy House. From this he markets each year several hundred thous and pansy plants (grown by the way from our Imperial German Strain which those who have used it consider unequalled for beauty and diversity of color and marking).

RADISH.

French grown seed make solid Radishes—Our packets of Radishes contain on the average about 900 Seeds—A light, quick, rich soil is best for Radishes.

AMERICAN COFFEE BERRY. (Soya Bean.)

Coffee (and very good Coffee, too,) for One Cent a Pound.

While nothing quite takes the place of good old Java or Mocha Coffee, the Coffee Berry, when used alone, makes a healthful, pleasant and economical beverage, with a strong coffee flavor, and quality superior, in our estimation to the many coffee substitutes now on the market. When blended and ground with good coffee, half and half, its presence can scarcely be detected. It is prepared just like coffee. The beans, which are about the size of the real coffee berry, are roasted, ground, and used either alone or mixed with coffee, as may be preferred. The plant, which takes from four to four and one-half months to mature, is about three feet in height. It fruits from the ground up, and on the limbs in every direction. The pods, of which there are from 150 to 250 on a plant, touch each other, so closely together do they grow. The pods contain on an average from two to three beans, of the shape and size shown in the illustration.

CULTURE. The rows should be planted three feet apart, one berry every ten inches apart in the row. Cultivated like corn or beans, and should be planted about the same time. PRICE. Large pkt., 10c; ¼1b., 25c; Lb., 75c; 5 lbs. @ 60c, by mail postpaid. Special prices in large quantities,

75c; 5 lbs. @ 60c, by mail postpaid. Special prices in large quantities.

ARTICHOKE ROOTS.

The New Large Jerusalem Variety; producing from 400 to 1000 bushels per acre. An excellent food for cattle, sheep and horses. Fed to milch cows they are, for the production of milk, equal if not superior to bran. But their greatest value is for food for hogs, Even the labor of feeding is avoided, as the hogs will help themselves if allowed to do so. We consider them the cheapest and healthiest hog food possible to raise, and find that where brood sows have free access to Artichokes, they and their pigs invariably do well. There is no better food to build up large, healthy frames, with plenty of bone and muscle. Hogs will not only grow, but fatten on them.

On good land, with the same culture as corn, Artichokes will produce from 400 to 1000 bushels per acre. A. C. Williams, of Iowa, a very prominent breeder of Poland Chinas, says: "Forty head of hogs and pigs may be kept without other food on an acre of Artichokes from the time frost is out of the ground until they grow again, and from October 1st until the ground freezes again. They produce more hog food per acre than any other crop I am acquainted with, and the hogs will harvest the crop themselves. Artichokes also produce an immense quantity of tops, of which cattle, horses and mules are very fond, and which makes excellent food when properly cured. A chemical analysis of roots shows them to be superior to Carrots, Parsnips, Mangels, Sugar Beets and Turnips, both as flesh and as fat formers."

PLANTING, CULTURE, PRICE, ETC. Artichokes need planting but once, and little or no culture after the first year. Cut as potatoes, only smaller; plant in rows three and one-half feet apart. Plow deep, plant shallow, say two inches; the second year, break up the ground as for corn; will come up thick all over the Surface. Run through each way with a cultivator when a few inches high. Prices, 1 lb., 30c.; 4 lbs., \$1.00, by mail postpaid. By freight or express. \$\frac{1}{2}\$ bu., 75c; 1 bu., \$\frac{2}{2}\$.00; barrel of 3 bu. for 1 acre, \$\frac{5}{2}\$.00.

ASPARAGUS ROOTS.

CAREFULLY NORTHERN FARM SEEDS CAREFULLY SELECTED GROWN

FROM THE WORLD'S GOLDEN GRAIN BELT.

Mr. JAS. J. HILL, Prest, Great Northern R. R.

It has become a well established principle of agriculture that the farther North seed can be grown and fully matured, the better they are. While this truth applies with equal force to nearly every kind of seed, the Northwest became so quickly famous for its cereals, as to cause farmers everywhere to turn here for their supplies in that direction. This tendency has become so well recognized amongst the trade that many seedsmen of the East and Middle West have almost dropped Field Seeds from their catalogues.

The whole drift of trade towards the natural source of supply has led us to devote unusual attention to the cult. ure of improved farm seeds, the result being that we have become the largest growers in the United States of fine seed grain, etc.

All practical farmers agree that seed grown year after year under the same conditions of soil and climate "runs out" after a time, rendering a change of seed not "runs out" after a time, rendering a change of seed not only desirable but necessary. To such we offer Northern Grown stocks of the best varieties, carefully selected, thoroughly re-cleaned, and at prices so reasonable as to enable every farmer who wishes to get a new start in

Please note our liberal terms of sale, viz., if any seeds received from us are not satisfactory on receipt and examination, they are to be returned at our expense and the money that has been paid for them will be refunded.

HAW'S SYSTEM OF PASTURING SHEEP.

Written for and published by us as Northrup, King & Co's PRIMER NO. 1.

PRIMER NO. I is from the pen of Prof. Thos. Shaw of the University of Minnesota. It treats of the pasturing of sheep on foods sown for them, other than grasses. The grazing of sheep on grasses is as old as the world, but pasturing them chiefly on foods other than grasses is an entirely new system, hence the name given to the book. In this book Prof. Shaw gives his experience in growing these foods and in pasturing the sheep on them. He tells how to sheep and lambs were pastured on one acre through the summer season and for three successive years. He shows how he pastured all the sheep on the Minnesota University Experiment Farm for two seasons successively on ten acres of land. In the one instance there were 86 sheep and lambs, and in the other instance there were 93. He shows how in each of those years more than 8 tons of Cured food and 6 tons of green food were received from the same land. He speaks of the poverty of the soil and of its enrichment at the end of the three years pasturing conducted upon it, and he dwells upon the benefits of the system in promoting the health of the sheep

and in destroying weeds.

The way in which the various foods were grown and pastured are described briefly and with much clearness. The information

on this point alone is very valuable. It is also shown how the farmer can adapt the system to

his own conditions, howsoever or wheresoever he may be situated. Prof. Shaw claims that by this system of growing pasture, all the sheep at present in the United States could be grown on 10,000,000 acres of Northwestern land, that is to say, on less, than the fifth part of the land surface of Minnesota. And they could be grown, he says, in much better form than as reared at present. There is so much that is good in the system that without any doubt it will in the near future revolutionize the methods of growing sheep in all the arable sections in the United States.

The experience, thought and labor of many years are condensed in this book. Applied it will mean millions of dollars to the farmers of this country.

A copy of this book will be sent free to those who send us an order for seeds amounting to 50c. or over and who ask us to send them PRIMER NO. 1, as a premium. Please note, that our PRIMERS are not for sale. Ten dollars would not buy a single copy. They are sent only to our customers.

THOMAS SHAW.

Prof. of Animal Husbandry, Minne-sota State Experiment Station.

Northrup, King & Co.,

Minneapolis, Minna

Gentlemen:

The Twenty-seven thousand pounds of Sugar Beet Seed which you imported last spring for the State of Minnesota, has proven in every way satisfactory.

I am glad, also, to express my appreciation of the excellent service rendered by you in distributing the seed.

Yours very truly,

Aug Nouvee.

THE SUGAR BEET.

There is good reason for the lively interest which now prevails in the United States over the question of manufacturing our own sugar; for of the vast amount of sugar now aggregating two millions of tons per annum, but little more than one sixth or about 300,000 tons are at present produced in the United States.

The foreign sugar used in this country is imported at a cost of over one hundred millions of dollars a year, a large part of which sum might well be retained in this country, should the attention of a small portion of the farmers located in the regions adapted to the cultivation of sugar beets, be given to the production of this valuable crop. While the production of our own sugar is a subject which should interest every one anxious to keep at home the enormous amount of money annually sent abroad for the purchase of sugar, it is of special and almost vital importance to the American Farmer. It would not only open to him a new market for the production of a profitable crop, but the proper culture of the sugar beet, greatly increases the productiveness and enhances the value of his land. It is the history of sugar beet culture in France and other countries, that lands upon which sugar beets have been properly grown and cultivated, will yield double the amount of grain over those lands on which they have not been grown.

Every farmer should therefore give attention to this subject and try small areas of sugar beet, and at the pro-

Every farmer should therefore give attention to this subject and try small areas of sugar beet, and at the proper time, send some of the roots to his nearest experiment station, which will be glad to analyze them without

Every farmer should the clotte give actions.

Every farmer should the clotte give action of the roots to his nearest experiment station, which will be glad to analyze them without charge.

This may aid in the establishment of a factory in your locality, but if it does not, you will have made a good deal in ascertaining for yourself the great value of the sugar beet as a food for stock and it will be worth to you, many times the cost of the experiment.

From ten to twenty pounds of seed are required to the acre, depending upon the method of seeding. Full cultural directions will be sent, if asked for, to those purchasing sugar beet seed from us.

Klein Wanzlebener and Vilmorin's have thus farproven most successful for this country. Our stocks of these two celebrated sorts are known as "Elite" Strains, meaning choice; select. This Elite seed is grown only from roots, (each of which is analyzed) which show the highest percentage of sugar and co-efficient of purity.

The Elite strains are the only ones that should be planted by those wishing to grow high grade sugar beets. Vilmorin, Elite. This beet is the result of thirty-five years of methodic and perservering selection. In black soils, rich in organic matter it gives better results than any other variety. It is extremely rich in sugar, thousands of analyses showing that the percentage of sugar which can be obtained from this variety, is about sixteen. Its average yield may be stated as from 12 to 16 tons per acre. Pound 45c; postpaid. By express or freight, Lb. 35c; 51bs. 36c; 101bs. @ 25c; 1001bs. @ 20c; bags included.

Klein Wanzlebener, Elite. This variety at the present time, has probably a wider cultivation than any other sugar beet. If may be distinguished from the Vilmorin by its brighter color and its lighter colored leaves, which are beautifully undulating, and scalloped about the edges. While not as a rule equal to the Vilmorin in saccharine richness, it is considerably more productive. Pound 45c; postpaid. By express or freight, Lb. 35c; 51bs. @ 30c;

SUGAR BEET FOR STOCK FEEDING.

We can furnish ordinary seed of Klein Wanzlebener, Vilmorin, Lane's Improved, Imperial and French white sugar at the following prices: Lb., 30c, postpaid. By express or freight, lb., 20c; 5 lbs. at 18c; 10 lbs. at 15c; 100 lbs. at 10c. Bags included. In ordering, state variety wanted.

Dr. C. J. Alloway.

The following statement from one of the most prominent authorities on Agriculture in the Northwest speaks volumes in showing the superior quality of our Swedish Turnips (Rutabagas) MANGEL and other ROOT SEEDS:

"For eight years I have used your seeds with the greatest success. I wish especially to commend your MANGEL and RUTABAGA SEED as the BEST I EVER USED. My experience in farming covers a period of over 20 years, during which time I have rarely cultivated less than TEN TO TWENTY ACRES OF MANGEL WURZEL AND SWEDISH TURNIP. As a stock breeder, I have always considered them my most important crops. I have always considered them my most important crops. I have bought seed from nearly every prominent house in the United States and Canada, and sometimes have imported it direct from England, but NEVER HAVE I HAD THE UNIFORMLY GOOD RESULTS THAT YOUR SEED HAS GIVEN ME. In North Dakota, where I had the largest herd of thoroughbred cattle, I AVERAGED FROM TWENTY TO THIRTY TONS OF ROOTS TO THE AVERAGED FROM TWENTY TO THIRTY TONS OF ROOTS TO THE AVERAGED FROM TWENTY TO THIRTY TONS OF ROOTS TO THE AVERAGED FROM TWENTY TO THIRTY TONS OF ROOTS TO THE AVERAGED FROM TWENTY TO THIRTY TONS OF ROOTS TO THE AVERAGED FROM TWENTY TO THIRTY TONS OF ROOTS TO THE AVERAGED FROM TWENTY TO THIRTY TONS OF ROOTS TO THE AVERAGED FROM TWENTY TO THISTY TONS OF ROOTS TO THE AVERAGED FROM TWENTY TO THISTY TONS OF ROOTS TO THE AVERAGED FROM TWENTY TO THISTY TONS OF ROOTS TO THE AVERAGE FROM TWENTY TO THISTY TONS OF ROOTS TO THE AVERAGE FROM TWENTY TO THE TY ONE OF ROOTS TO THE AVERAGE FROM TWENTY TO THE TY ONE OF ROOTS TO THE AVERAGE FROM TWENTY TO THE TY ONE OF ROOTS TO THE AVERAGE FROM TWENTY TO THE TY ONE OF ROOTS TO THE AVERAGE FROM TWENTY TO THE TY ONE OF ROOTS TO THE AVERAGE FROM TWENTY TO THE TY ONE OF ALLOWAY.

**VOURS HERE TO THE THE TWENTY TO THE TY OF THE AVERAGE FROM THE TY TO THE TY TO THE TY THE TY THE TY TO THE TY THE TY

NOTE.—We value very highly the above expression from Dr. Alloway, who was State Veterinarian for North Dakota for three years; for a long time President of the Fine Stock Growers' Association of North Dakota: Lecturer to State Agical tural College, at Brookings, S. D.; Director in Grand Forks County Agricultural Society, and one of the largest, most progressive and successful stock breeders in the U. S.

A Field of N. K. & Co's Prize Winner Rutabaga.

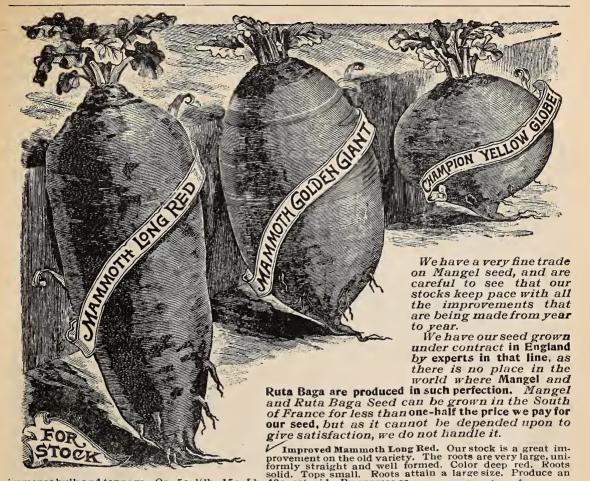

N. K. & Co's Prize Winner Rutabaga. Prize Winner is a purple-topped variety, growing to a large size, with a single tap root and very small and fine top, short neck, smooth and symmetrical; is a certain cropper. It produces a very heavy weight per acre, and keeps sound and good until late in the spring. From reports received from those who have grown it, we do not hesitate to say that we possess the Handsomest and Best Stock of purple-top Rutabagas in cultivation. We have sold many thousand pounds of this magnificent strain and have never received a single complaint about them. Large pkt. 5c; oz. 10c; ¼ lb. 15c; lb, 50c; postpaid. By freight, lb. 40c; 51bs. \$1.75; 101bs. \$3.25.

Carter's Imperial Hardy Swede. A standard English variety which produces extraordinary crops. Large pkt. 5c; oz. 10c; ¼ lb. 15c; lb. 40c; postpaid. By freight, lb. 30c; 101bs. @ 25c. N. K. & Co's Prize Winner Rutabaga. Prize Winner

Sweet German. One of the very best sorts on account of its productiveness and quality. This consideration should count strongly with stock growers, all of whom understand that the quality of the feed regulates the quality of the product. Large pkt. 5c; oz. 10c; ½1b. 20c; lb. 50c; postpaid. By express or freight, lb. 40c; 51bs. \$1.75.

Hurst's Monarch Swede. We first saw this splendid variety in England, and were the first to bring it to the attention of the American trade. It is very distinct in type, being of tankard shape. On account of the size it attains, it will yield from two to seven tons more to the acre than any other variety. Pkt. 5c; oz. 10c; ½ lb. 20c; lb. 60c; postpaid. By express or freight, lb. 50c; 5 lbs. \$2.25; 10 lbs. \$4.00.

If interested in Sheep try Thousand Headed Kale. Page 39.

Solid. Tops small. Roots a Oz., 5c; ¼lb., 15c; Lb., 40c postpaid. By express or

immense bulk and tonnage. Oz., 5c; ¼lb., 15c; Lb., 40c postpaid. By express or freight, Lb., 30c; 51bs. @ 25c lb.

Mammoth Golden Giant Mangel. Very Large. Remarkably even in shape, of vigorous growth; has a fine neck and a very smooth skin. Flesh white, firm and sweet, much liked by cattle. Easily lifted from the ground, producing enormous crops. Excellent keeper, yields 40 to 60 tons per acre. Oz., 5c; ¼1b., 15c; lb., 45c; postpaid. By freight, lb., 35c; 51bs. @ 30c per lb.

Red Globe Mangel. Similar to the Yellow Globe in general character, and, like it, well adapted to shallow soils. Oz., 10c; ¼lb., 15c; lb., 40c. By freight, lb., 30c; 51bs, @ 25c.

Champion Yellow Globe Mangel. A favorite variety, very productive, easily pulled and a good keeper, It is spherical in shape, orange-yellow color, top tinged with green; flesh of the root white, firm and sugary. One of the best for 1ght soils. Oz., 10c; ¼ lb., 15c; lb., 40c., postpaid. By freight, lb., 30c; 51bs, @ 25c. per lb.

light soils. Oz., 10c; ½ lb., 15c; lb., 40c., postpaid. By freight, lb., 30c; 5 lbs, @ 25c. per lb.

Taber's Gate Post Mangel. This is the production of one of the largest mangel specialists of England. It is thought by many to be the most profitable of all mangels, and is exceedingly popular in those sections where it is best known. It resembles somewhat the Golden Tankard in appearance, but is not so large; skin is yellow and smooth; flesh white and very firm. Oz., 5c; ½ lb., 15c; lb., 45c postpaid. By express or freight, lb., 35c.; 5 lbs. @ 30c.

Improved Golden Tankard. We have for years insisted that this was the best mangel grown, and each season strengthens us in the position we took when it was a comparatively unknown sort. We recommend it unqualifiedly as the best mangel by far for dairy farmers. It combines apparently all the fine points possible to condense into a mangel. The illustration (engraved from a photograph) shows the shape. The color is a deep rich yellow. The flesh is yellow and white in rings beautifully alternating with each other. On account of its shape enormous crops are grown, and it is easily lifted from the ground. Oz., 5c; ½ lb., 15c; lb., 40c, postpaid. By express or freight, lb., 30c; 5 lbs. @ 25c.

I have lived here eight years and never saw such a miserable, backward spring as the last one, but I can cheerfully write you that I have an A Number I garden, Every seed grew, and I have the first vegetables in this tocality, both as to quality and quantity. (Signed) S. M. WARMAN, Sandatone, Minn.

The Kentucky Wonder Melon was a complete surprise. From one once of seed have picked half a wagon load, some of which weighed 40 lbs., and more yet on the vine. If the ats anything I ever waw (Signed)

E. E. BALDWIN, Ada, Kansas.

The seeds you sent us did finely. The Tuberoses are in bud. Your Early Minnesota Tomatoes are the finest I ever ate, and they ripen so early.

(Miss) LILLY TUCKER, Bangor, Me.

The seeds I ordered of you last spring have proven to be first-class in every particular.

(Signed) NEILS R. THAGE, Livingston, Mont.

We believe our DWARF ESSEX Rape to be the BEST OBTAINABLE.

CARROTS FOR STOCK.

IMPORTANT.—Owing to the large size which these Carrots attain less seed is re-quired to the acre than of other sorts—2 lbs. per acre being sufficient.

Northrup, King & Co.

Northrup, King & Co.

No one who feeds stock can afford to be without Carrots. I feed each year Mangel Wurzel, and Ruta Baga, and regard them very highly; but Carrots I consider indispensable. I increase my acreage of Carrots each year, and believe I secure better proportionate results from their use than from anything else I feed.

As to varieties, nothing can be better in point of quality and great productiveness, than your VICTORIA (yellow), and MASTODON (white). I use them both, and have never yet seen them equalled.

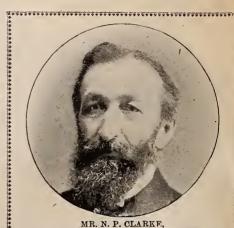

seen them equalled.

In this connection I am glad to express the unqualified satisfaction your seeds have given me in the many years I have traded with you.

Very truly yours, N. P. CLARKE.

SPECIAL OFFER.

In order that our customers may test the comparative merits of these test the comparative merits of these two grand Carrots, we will send to any address, postpaid, to any part of the United States, one pound each of the MASTODON and VICTORIA Carrots for \$1.50. Eight cents per pound can be deducted if sent by express or freight at purchaser's avenue. at purchaser's expense.

MR. N. P. CLARKE,
Proprietor of the Meadow Lawn Stock Farm,
St. Cloud, Minn.
Mr. Clarke's celebrated stud of Clydesdales supplied the Sweepstake winners and nearly all the championship winners at the World's Columbian Exposition.

N. K. & Co's MASTODON Carrot. This is the heaviest cropping Carrot grown, yielding more tons to the acre than any other sort. The flesh is white, crisp, solid and very sweet in flavor. It is a vast improvement on the white and green Belgian sorts which have been such favorites in the past, as it is not only much more productive but vastly easier to handle. The roots are short and very heavy at the shoulder, rendering them easily harvested. An important feature, also, is that they do not easily break in pulling or storing. Too much can scarcely be said of their size and great productiveness. The roots frequently measure 15 to 20 inches in circumference, and 18 to 25 tons to the acre is not an extravagant statement as to the yield. Large Pkt. 10 cts; ½ lb. 30 cts; ½ lb. 50 cts; 11b. 90 cts; 5 lbs. \$3.75, by mail, postpaid.

N. K. & Co's VICTORIA Carrot. This is the largest and unquestionably the heaviest

ouired to the acro than of other sorts-2 lbs. per acro being sufficient.

N. K. & Co's VICTORIA Carrot. This is the largest and unquestionably the heaviest form of Orange or Yellow Carrot known. The roots are remarkably fine, very symmetrical and of excellent quality, possessing high feeding properties. It is a heavy cropper on all soils, but arry varieties, and as the roots grow more above the ground, it is much easier to gather the crop. This grand variety is sure to suit every one who grows it. Large Pkt. 10 cts; ½ lb. 30 cts; ½ lb. 50 cts; 1 lb. 90 cts; 1 lb., 50 cts; 15 lb., \$2.00, by mail, postpaid.

White Belgian. Grows long; green top, well out of the ground. Large Pkt., 5 cts; ½ lb. 20 cts; ½ lb. 30 cts; 1 lb. 50 cts; 5 lbs. \$2.00, by mail, postpaid.

Yellow Belgian. Similar to the white, but yellow in color. Large Pkt., 5 cts; ½ lb. 20 cts; ½ lb. 30 cts; 1 lb. 50 cts; 5 lbs. \$2.00, by mail, postpaid.

"THE FINEST CARROTS I EVER 5AW."-JACOB GINTZ, Huntington, Ind., writes: "Your Mastodon are the finest I ever saw. I had several weighing 3½ lbs.

"SINPLY GRAND."-"Your Mastodon carrots are simply grand as are also the Victoria. Drawf Essex Rape is extra good and also your Early Minnesota sugar cane. I am well pleased with your seeds."-GEORGE ALLEN, Allerton, Ill.

"FIRST PRIZE IN NORWAY."—"My cousin in Norway, to whom I sent some Carrot Seed from your house, writes me that he took first prize at their fair with the Victoria Carrot, and that they attracted great attention on account of their size and solidity."—NILS MICHELET.

"KNOWS NOW WHERE TO GET HIS SEED."—"Your Mastodon carrots beat anything I ever saw in the carrot line. I sent to—for some of the Mastodon last year but did not get the right kind. I ordered some for my neighbors at the same time and they were very much put out at me."—JOTHAM ALLEN, Ithaca, Mich.

"YIELDED DOUBLE THE CROP OF ANY OTHER VARIETY."—MR. H. E. BUTTERS, East Exeter, Me., writes:
"Last Spring you sent me ¼ lb. of your White Mastodon Carrot. I gave them ordinary field culture and planted them side by side with White Vosges, Long Orange, and Oxheart. The Mastodon yielded at least double the crop of any other variety. Most of them grew a foot long or more, and measured 3½ to 4 inches in diameter, and weighed 2½ lbs. or more. They are far ahead of any Carrot I have ever tried, unless it be the Victoria. I took first premium on a bushel of them at our County Fair. Every one says they are the finest Carrot ever seen here. They pull without a fork, and come up clean and handsome. Your other seeds have always given good satisfaction."

It seems no exaggeration to say that we could fill a book as large as this Catalogue with the written and spoken praises that our customers have lavished upon Mastodon and Victoria Carrots. We have yet to learn of a single instance in which they have failed to give the fullest satisfaction. Wherever they are shown at Fairs, they invariably capture the prizes.

NORTHRUP, KING & CO'S SEED OATS .- Heavy, Vigorous, Productive.

NORTHRUP, KING & CO'S LINCOLN OAT. An Agricultural Wonder. Its record has never been equalled. The LINCOLN OAT has an established, undoubted and fully verified yield of 817 bushels and 21 pounds from 7 bushels of Seed.

Obtain your seed direct from the introducers, and secure genuine stock.

Do not neglect the opportunity to secure the seed of this magnificent, unequalled Oat, at the present low price.

HARVESTING LINCOLN DATS.

We believe the Lincoln Oat to be the best ever introduced. The claims we made for earliness, freedom from rust and enormous yielding qualities when first sending it out, have been fully sustained on every point and from all sections. Hundreds of customers have written us that on account of its stiff straw, it stood up perfectly under weather that caused all other varieties to lodge. It is the best and most economical Oat for feeding, on account of its thin hull, heavy meat and soft nib. Price of Lincoln Oats: Per bu. of 32 lbs., 70 cts; 2 bush., \$1.25; 10 bush., \$5.50; 20 bush., \$10.00; 100 bush., \$45.00. Sacks included. Delivered to R. R. Minneapolis. Why plant unknown varieties or run out stock, when you can get true stock of Lincoln Oats

at these low prices.

N. K. & CO'S BLACK BEAUTY.

N. K. & CO'S BLACK BEAUTY.

We imported from W. H. Mold, the celebrated English Oat specialist of England, (whose American agents we are.) a few bushels of a very select and high priced variety of black oats which we have named N. K. & Co's Black Beauty.

While few black oats are grown in the United States, they take the preference in most European countries, and it is safe to say that in England, two bushels of black oats are grown to one of white.

There, black oats are preferred to white, principally on account of their superior yielding qualities, but beside being fully equal to white oats in point of feeding properties, they possess another very valuable characteristic, in the unequalled stiffness and strength of straw. Nothing less than a tornado or a cyclone will lodge them, Mr. J. W. Nesbit, who grew these oats for us, on his farm in Hennepin County, Minnesota, says:

"All of my other oats lodged more or less, but these black oats stood up perfectly; the straw was as stiff as hazel brush. We took off from our three-times as much as any white oats we had."

Our stock of the Black Beauty is too limited to offer in quantity and as we desire to retain control for the present, we this year offer it by the pound only. 50 cts. per lb. 3 lbs. for \$1.00, by mail postpaid. No larger quantity than three pounds will this year be sent to any purchaser. We think it may be worth fifty cents to you to find out if this is not an oat you ought to have.

NEW ZEALAND RUST PROOF.

This variety was introduced into this country by means of a small package sent some years ago by a traveler in New Zealand to a friend in Iowa. It is a white side oat with medium sized grain, heads are extra long, heavy and full, averaging about 100 grains each, grows taller than ordinary and is medium early, though several days later than the early round head varieties. Its great hardiness and the strength and

stiffness of its straw is remarkable. It stools out extra well and requires less seed per acre than most kinds. It does not rust and unlike all other varieties of side oats has never been known to lodge and instead of having a tendency to deteriorate it seems to improve each year as it becomes more acclimated. Lb., 20 cts. by mail post paid; by express or freight; peck, 30 cts.; bush., 80 cts.; 2 bush., \$1.50; 10 bush., \$6.00; 50 bush., \$25.00. Bags included.

WHITE RUSSIAN (Improved).

The original stock of White Russian Oats was really a capital Oat, and sprung immediately into great favor. Of late years it has become badly mixed and deteriorated, through not being properly grown. Largely through the efforts of a customer of ours in Dakota, we are able to offer the White Russian in its old time purity. It is a well established fact that the true White Russian is as nearly rust proof as any Oat can well be, and we are confident that many will hail its re-introduction with satisfaction, Lb., 17 cts., by mail, postpaid. By express or freight: peck, 25 cts.; bush., 75 cts.; 2 bush., \$1.40; 10 bush., \$5.50; 20 bush., \$10.00. Bags included. Bags included.

EARLY ARCHANGEL.

The original stock of this Oat was obtained from Archangel, a hamlet in the north of Russia, and since Its introduction to this country has been grown with great success. It has proven itself to be absolutely the earliest oat yet introduced; it is a heavy yielder, does well on light soil, and is a most satisfactory Oat in all respects. Its principal attraction is its extra earliness; and by this quality it escapes many of the ills which Oats are heir to. The straw is stiff, well glazed and erect. The grain itself is plump, heavy, exceedingly white, and of excellent feeding quality. The seed we offer is of our own growth from the original stock. Lb., 17 cts., by mail, postpaid; By express or freight: beck. 30 cts.; bush., 90 cts.; 2 bush., \$1.75; 10 bush., \$7.50. Bags included.

NORTHRUP, KING & CO.'S WHITE HULLESS BARLEY.

Engraved from a Photograph, Showing Seed and Head.

ITS VALUABLE PROPERTIES.

It is HULLESS.

It is BEARDLESS.

It is EARLY.

It WEIGHS over 60 POUNDS TO THE MEASURED BUSHEL.

It YIELDS WELL on POOR LAND.

It YIELDS ENORMOUSLY on GOOD LAND.

It makes BETTER PORK than CORN.

It makes EXCELLENT FLOUR.

The Straw makes GOOD HAY.

It is OF INESTIMABLE VALUE to EVERY ONE WHO FEEDS STOCK.

The following letter from Mr. D. C. Carpenter will describe this valuable Barley and the uses to which it may be put, while at the same time giving the actual experience of one who has grown it largely:

NORTHRUP, KING & CO.,

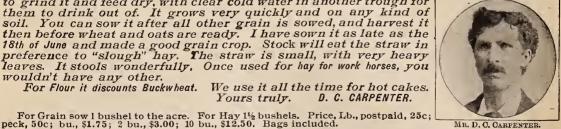

Gentlemen: You ask me what I think of the WHITE HULLESS BARLEY. I have grown 60 bushels to the acre, and it is the best grain to sow for hay that grows. Sow early and you can cut two crops from the same sowing.

As fattening feed for hogs it has no equal, It makes sweeter MEAT and nicer lard by far than corn. I fattened 20 hogs for one butcher here with it, and made a gain of 106 lbs. to the hog in five weeks. The butcher said that he never

handled such fine pork before.

I have tried feeding it in all ways, and I find the best way is to grind it and feed dry, with clear cold water in another trough for them to drink out of. It grows very quickly and on any kind of soil. You can sow it after all other grain is sowed, and harvest it then before wheat and oats are ready. I have sown it as late as the 18th of June and made a good grain crop. Stock will eat the straw in preference to "slough" hay. The straw is small, with very heavy leaves. It stools wonderfully, Once used for hay for work horses, you wouldn't have any other.

For Flour it discounts Buckwheat. We use it all the time for hot cakes. Yours truly. D. C. CARPENTER.

MR. D. C. CARPENTER.

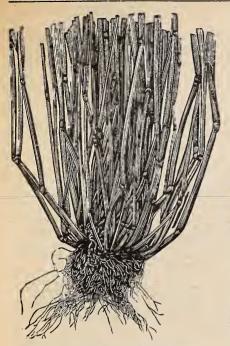

N., K. & Co.'s Highland Chief Barley. This is a two rowed, very productive, vigorous grower, less likely to be damaged by wet than most other kinds

It usually weighs quite 501bs, to the measured bushel and is the largest berried and handsomest barley grown. Price, Lb., 25c., postpaid; by express or freight, peck, 50c; bu., \$1.75; 2 bu., \$2.50; 10 bu., \$10.00.

New Beardless Barley. All barley growers have experienced the annoyance occasioned by the chafing and sticking of the beards while threshing. This nuisance has been overcome in the New Beardless Barley, which is entirely free from beards. This barley is six rowed, the straw grows to a good height, is stiff and strong, and does not readily lodge. The heads resemble smooth wheat, with the exception of a small duck bill on the point of each grain. This comes off readily in threshing, leaving the threshed grain looking like any other white barley. Price, b., 20c., postpaid; by express or freight, peck, 50c; bu., \$1.50; 2bu., \$2.50; 10 bu., \$10.00. Bags included.

Manshury Barley. This is the best six-rowed barley we ever grew or ever saw. Lb., 20c; 31bs., 50c., postpaid: by freight or express, peck, 40c; bu., \$1.00; 2 bu., \$1.50. Bags included.

Black Hulless Barley. We have sold a good deal of this barley during the last 15 years, and it has given most excellent satisfaction as a feeding barley. We strongly recommend the White Hulless in its place, but as many will be reluctant to believe that anything can be better than the Black Hulless, we still offer it. Lb., 20c postpaid; peck, 40c; bu., \$1.25; 2bu., \$2.00; 10 bu., \$8.50. Bags included.

From a Photograph showing Stooling Propensities of Spring Fife Wheat.

SPRING WHEAT.

PRICES. We are obliged to ask a considerable advance over the market price, for our high grade seed wheat, as there is a very much larger cost attached to its production and preparation than any one who has not had the experience could possibly appreciate. Space does not permit of going into details, but as a matter of fact, the prices below named for the larger quantities, represent but a slight advance over the actual cash outlay to us.

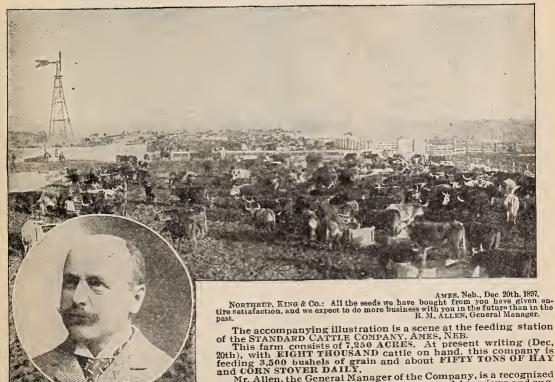

We believe that farmers who want to change their seed will find it very much to their advantage to secure enough at least to give them a start.

To those who do not care for the pedigree, or highly improved stock, but want simply good, healthy, sound and reasonably clean wheat, we would state that. Minneapolis being the largest wheat receiving city in the United States, we are in position at all times to select from the hundreds of cars which are daily arriving, excellent lots of either Fife or Blue Stem, and which we will sell either in car or less than car lots, at a slight advance over the prevailing market price. Will be glad to send samples and prices upon application.

Pillsbury Fife Spring Wheat. We consider this to be the best and purest stock of Fife wheat obtainable. Great pains has been taken in its selection. Our stock grades No. 1 Hard and is perfectly sound and healthy. Lt., 20c. postpaid. By express or freight, peck, 60c; bu., \$1.75; 2 bu., \$3.25: 10 bu., \$15.00; 50 bu., \$70.00.

Saskatchewan Fife Spring Wheat. Noted for its great productiveness, earliness, vigor and freedom from smut and disease. This wheat has become so well known as to render extended description of it unnecessary. We first brought it to the attention of the trade in 1884, and it has well sustained the claims then made for it, as the earliest and healthiest Spring Wheat. Lb., 20c, postpaid. By express or freight, peck, 50c; bu., \$1.60; 2 bu., \$3.00; 10 bu., \$14.00; 50 bu., \$65.00, bags included.

Velvet Chaff Blue Stem Spring Wheat. A distinct variety from all other spring wheats. The stem,

MR, R. M. ALLEN. General Manager Standard Cattle Co., Ames, Neb.

AMES, Neb., Dec. 20th, 1897.

NORTHRUP, KING & Co.: All the seeds we have bought from you have given entire satiafaction, and we expect to do more business with you in the future than in the past.

R. M. ALLEN, General Manager.

and CORN STOVER DAILY.

Mr. Allen, the General Manager of the Company, is a recognized authority on cattle feeding in this country, and his views and suggestions are widely sought. With notable generosity and public spirit Mr. Allen places at the disposal of inquirers the valuable results obtained from his large experience and numerous experiments. Mr. Allen is also deeply interested in Sugar Beet Culture. He is President of the American Sugar Growers' Society and President of the Nebraska Beet Sugar Association.

Mr. C. W. Sutton, Hillsboro, N. D.

Hillsboro. N

Hillsboro. N. D., Dec. 10, 1897.
NORTHRUP, KING & CO., Minneapolis, Minn. GENTLEMEN: — After purchasing seeds of you for more than ten years. and finding them always of the best quality, I wish you to know that I recognize and appreciate the great advantages that I have reaped in being able to obtain such reliable seeds. I wish particularly to make mention of the Mercer Corn, that I first obtained from you about eight years ago, and have raised ever since, greatly to my adeight years ago, and have faised ever since, greatly to my advantage and satisfaction. Always testing my own corn before planting, I have sometimes found that only a small percentage of it would grow. When I have sent to you for seed, that in every instance has proven to be reliable. I should like to know

There is no man owning buildings but who sleeps more soundly at night from knowing that they are INSURED. Farmers who plant our TESTED MINNESOTA GROWN SEED CORN are, to a great extent, INSURED Those are anxious days for the farmer

when, with a good crop in sight, he is wondering whether early frosts are not going to catch his corn. Five to ten days in the latter part of the season are very often CRITICAL DAYS.

This anxiety and risk can be greatly lessened by planting OUR MINNE-SOTA GROWN SEED A VAST AMOUNT OF MONEY would be saved to the country each year if farmers would plant seed grown as FAR NORTH AS POSSIBLE.

As the Originators or Introducers of

nearly all the Standard Early Varieties of Seed Corn in use to-day, we consider that we may justly claim to be HEAD-QUARTERS for Northern Grown Seed Corn, that is NORTHERN GROWN.

be reliable. I should like to know your secret in being able to always furnish seeds that will grow.

Yours truly,

C. W. SUTTON.

" The INHERITED QUALITY OF CORN to YIELD HEAVILY OF POORLY, all comes in the TEN POUNDS MORE OR LESS OF SEED PLANTED. W. M. HAYS.

Does it pay to plant mixed, run out Corn from crib when an investment of a few cents an acre will secure selected vigorous stock of your favorite variety?

your favorite variety?

It will be noticed that we list not only early varieties, but all the best late sorts, like the Leaming, Champion Pearl, etc., etc., these sorts having been grown as far north as they will ripen thoroughly. We wish to impress on farmers living in Illinois, Nebraska, etc., that by planting our Seed, of LATE sorts, they will be able to secure their crops earlier than could possibly be the case with seed grown farther south. south.

Prof. W. M. Haus.

A RECOMMENDATION. OUR CORN IS TESTED. We do not, however, feel like losing an opportunity of strongly urging our customers, WHEREVER they may purchase their seed, to TEST IT BEFORE PLANTING. It is but little trouble to try a few seeds in earth, and in this way the responsibility can be placed where it belon s. rrarrerena de la compansión de la compan

N., K. & CO'S MINNESOTA KING CORN. (Yellow Half Dent.) We regard this corn (introduced by us in 1889) as the most valuable early Corn ever sent out. There are varieties that under exceptionably favorable circumstances will yield as much, but year in and year out, through fat years and lean years, there is, we believe, no sort that will do as well. It seems to possess a faculty of growing right along and making a crop during weather and under conditions that would ruin other varieties. We do not know of any good reason why this should be so, but not only is this our own experience, but we have received like testimony from hundreds to whom we have sold it: the universal expression being that for ability to endure extremes of heat and cold, flood and drought it has no equal. In appearance the Minnesota King is remarkably distinct, being a half yellow dent, the kernels are very broad and of an extremely rich golden color. The ear is of good size, eight rowed, cob small. Large pkt., 10 cts.; lb., 25 cts.; 3 lbs., 60 cts.; postpaid. By express or freight, peck, 50 cts.; bushel, \$1.75; 2 bushels, \$3.00; 10 bushels, \$12.50; bags included. \$12.50; bags included.

NOTE,—This corn was introduced by us several years ago, and although each season we have anticipated the large sale which it has met by what we considered liberal provisions, we have never as yet been able to supply the demand, having returned money yearly to late purchasers.

"A NORTH DAKOTA EXPERIENCE."

DURBIN, NORTH DAKOTA, Aug. 2d., 1897.

NORTHRUP, KING & Co., Minneapolis, Minn.

Gentlemen;-In reply to yours July 29th., as to the satisfaction given by seeds bought of you last spring, I take great pleasure in reporting ENTIRE SATISFACTION.

Of the 60 bushels of seed corn, mostly Minnesota King, bought of you for, and planted by myself and neighbors, I HAVE NOT HEARD A SINGLE COMPLAINT. This corn was ordered in several different lots at different times, I have talked with those who planted the greater part of it and all report ENTIRE SATISFACTION. The cold, wet, and frosty planting season of 1897, will long be

remembered by corn planters, owing to the great and unusual trouble with seed corn throughout the Northwest, and YET YOUR SEED STOOD THE TEST here in the cold Red River Valley of the north, and when that is said nothing further need be said in its favor.

The 4 qts. each of 4 varieties of garden peas were very fine. Could not be more perfect in every way. I was equally well pleased with all of the other garden seeds received from you.

Yours truly, L. W. SCOTT.

free.

Rustler, Early White Dent. Obtained from a few kernels sent us in the autumn of 1884 by a Dakota farmer, who stated that he had matured it in that state for 7 successive years; that it was the only corn in his section which could show such a record. For early ripening, great yield, compact growth of ears it is one of the best; admirably adapted to a Northern climate. Those wishing a first-class White Dent corn will find in the Rustler a lard corn to match, Largepkt. 10c; Lb. 20c; postpaid. By express or freight peck 50c; bushel \$1.50; 2 bushel \$2.75; 10 bushel \$12.00; bags included.

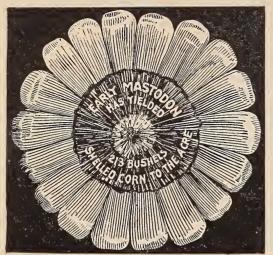

peck 50c; bushel \$1.50; 2 bushel \$2.75; 10 bushel \$12.00; bags included.

Pride of the North. Early Yellow Dent. We consider our Dakota Dent a marked improvement over Pride of the North for earliness and as a better yielder. Those wishing the Pride of the North, however, will find our stock especially desirable. Large pkt. 10c; Lb. 20c; postpaid. By express or freight, peck 40c; bags included.

Huron. Early Yellow Dent. Fine strain of early corn. Grain deep golden yellow, and large, while cob is very small. 70 lbs. of ears have made 64½ lbs. of shelled corn, leaving only 6½ lbs. of cobs. Large pkt. 10c; Lb. 20c; postpaid. By express or freight, peck, 50c; bushel \$1.40; 2 bushel \$2.50; 10 bushel \$10.00; bags included. Smut Nose Flint. A yellow flint corn blazed with red at end of ear. Bars are large and round. This is a very early variety, and a great favorite in many localities. Our stock is very fine. Large pkt. 10c; Lb. 20c; postpaid. Peck 50c; bushel \$1.75; 2 bushel \$3.00; 10 bushel \$12.50; bags included.

Pride of the North. Early Yellow Dent. We consider our Dakota of the North for earling only 6½ lbs. of cobs. Large pkt. 10c; Lb. 20c; postpaid. System of early variety in the selection of the state of early early variety in the selection of the North for earling experience of the Minnesota State Experiment Station has for some years past, been conducting a series of experiments with many kinds of corn, having particularly in view, the selection of an early variety that would give larger yields than any at present known. University Number Thirteen was the variety finally selected for dissemination. Prof. Hays does not claim any fancy qualities for University Number Thirteen. In fact, he states that it has not been selected rigidly to a type, in appearance, as that would have interfered somewhat with the selection for large yields and profits. The exince of the two years following the introduction of this corn, has fully demonstrated its ability as a producer. It is a full Yellow Dent sixteen rowed variety,

Do not let Foul Seeds get a mortgage on your Farm, use STERLING GRASS and CLOVER SEEDS.

IMPROVED MASTODON CORN.

IMPROVED MASTODON CORN.

In the celebrated American Agriculturist Corn Contest, Mastodon Corn outylelded by far every other variety of Yellow Corn. Alfred Rose of Yates County, N. Y. raised on one acre 15,898 POUNDS of CORN ON THE EAR which made 213 BUSHELS of SHELLED CORN. The originator states: "The Early Mastodon corn, named Mastodon because of its large ears, has been brought to its present standard by careful selection. The seed trade and large growers of field corn have for many years been anxiously inquiring for a large-eared, yet early Dent Corn, and to supply their wants I have for years been studying it up, and until I got up this corn was not fully satisfied. Many sorts have been tried and found wanting. In the Mastodon your customers will find a high-bred corn, which will please them, I claim for this corn the largest number of rows on cob, and the deepest, longest grains of any corn ever originated. It grows very rapid, strong and rank, at a medium height, and will out-yield any corn ever grown in this section. You cannot too highly recommend this corn to your customers. I have grown thousands of bushels of Golden Beauty, and the Mastodon is from three weeks to one month earlier, growing side by side and planted the same week; and again Mastodon Corn is from one week to ten days earlier than any Leaming Corn grown. Price for Mastodon Corn: Large Pkt., 10c; 1b., 20c, postpaid; by express or freight, peck, 50e; bu., \$1.25; 2 bu., \$2.00; 10 bu., \$8.50. Bags included.

NOTE. While Mastodon Corn has throughly established itself as the earliest of the large eared varieties, and is early as compared with Golden Beauty, Leaming, and other standard late sorts, we do not as yet recommend it for general planting north of latitude 43. We more to be able to recommend it for general planting as far north as latitude 45. Meantime, we hope as many as possible of our customers in the north, will try a small quantity and report their success.

IOWA GOLD MINE CORN.

This is a fine new variety. It is early, ripening only a few days later than the Pride of the North; ears are of good size and symetrical; color a bright golden yellow, as handsome as a twenty dollar gold coin just from the mint: grain is very deep; cob small; and therefore dries out very quickly as soon as ripe. Price, lb., 20c, postpaid; by freight or express, peck, 40c; bu., 1.25; 2 bu., \$2 00; 10 bu., \$8.00. Bags included.

STANDARD LATE VARIETIES.

Golden Beauty (Yellow Dent). The largest Grain and handsomest yellow dent corn in cultivation; the ears are large, of perfect shape, and in every way present as perfect a type as could be desired; has from ten to four-teen rows, and fills out well to the end of the cob; grows eight to ten feet high. Not recommended for the North-west, but for the Middle and Southwestern states. Sample sent on receipt of stamps for postage. Large Pkt., 10c; lb., 20c, postpaid; by express or freight, peck, 40c; bu., \$1.00; 2bu., \$1.75; 10 bu., \$7.50. Bags included. Improved Leaming (Yellow dent). Ears of good size, cob red and small, with a deep large grain of bright yellow. It is a strong grower and produces well on light or heavy land where other varieties of yellow dent would not thrive. Large Pkt., 10c; lb., 20c, postpaid; by express or freight, peck, 40c; bu., \$1.00; 2 bu., \$1.75; 10 bu., @75c. Bags included.

Champion Pearl (White dent). A pure white dent corn, exceedingly heavy, very compact, very prolific; will grade No. 1 White in any market; can be planted thicker than large corn and bear full sized ears; it stands storms and drouths well. Large Pkt., 10c; lb., 20c, postpaid; by express or freight, peck, 40c; bu., \$1.00; 2 bu., \$1.75; 10 bu., @ 75c.

FODDER CORN

FODDER CORN.

STOCKMEN, DAIRYMEN and others using FODDER CORN should place their orders EARLY, so that they can secure it at the low prices, test it and have corn on hand that they KNOW WILL GROW when ready to plant.

From one-half to two and one-half bushels are required to the acre. It may be planted in hills, drills or broadcast. THE CLOSER IT IS PLANTED THE FINER THE FODDER. Often four bushels are sown to the acre; this, in our judgment, is too much, as by such dense growth it is deprived of sun and air. Such fodder, if fed before drying is watery and washy, and when dry is light and chaffy, in neither case containing much nutriment.

tery and washy, and when dry is light and chaffy, in neither case containing much nutriment N. K. & Co. Giant Fodder. In proportion to the quantity of leaf this variety has a smaller stalk than any other fodder corn known to us. In growth it is very tall and leafy, and yields an immense quantity of fodder of excellent quality. The B & W., Soo, and other well known varieties of fodder corn grow just as tall and often throw out leaves that are just as large, but the extraordinary productiveness of the Giant Fodder corn arises from the closeness of the joints, and as leaves are thrown out at every joint, the result is an increased yield of fodder over every other variety with which we are acquainted. Lb., 20c, postpaid; by express or freight, lb., 10c; peck, 30c; bu., 85c; 2 bu., 1.60; 10 bu., @ 75c. Bags included.

Red Cob Fodder. In habit of growth it is very similar to the Giant. It has been before the public for some years and undoubtedly meets with the largest sale of any fodder corn. Lb., 20c, postpaid; by express or freight, lb., 10c; peck, 30c; bu., 81 50; 10 bu., @ 70c. Bags included.

Elephant Fodder Corn. This is a yellow seeded, large growing, leafy southern variety, selected solely with a view of producing the largest yield of fodder at the lowest possible cost. We have grown this in large quantities and the very low price and splendid quality should cause it to sell quickly. Price, bu., 60c; 2 bu., \$1.0; 10 bu., @ 50c. Bags included.

did quality should cause it to sell quickly. Price, bu., 60c; 2 bu., \$1.10; 10 bu., @ 50c. Bags included.

Evergreen Sweet Fodder Corn. It is an undeniable fact that there is better feeding quality in one ton of Evergreen Sweet Fodder Corn than in a much larger quantity of any other variety. The reason is evident from the fact that all sweet corn possesses very much more sugar than the field sorts, and as sugar is the most important constituent, it necessarily follows that the corn possessing this in greatest quantity is most valuable. It does not, however, yield as largely as the above named sorts. Lb., 20c, postpaid; by express or freight, lb., 10c: peck, 35c; bu., \$1.10; 2 bu., \$2.00; 10 bu., @ 85c. Bags included.

DWARF ESSEX RAPE.

We were the first Seed House in America to bring Dwarf Essex Rape prominently forward as a desirable and economical Pasturage for Sheep. We were the first Need House in America to bring Dwarf Essex Rape prominently forward as a desirable and economical Pasturage for Sheep. Following Professor Shaw's first bulletin on the subject written while he was connected with the Canadian Department of Agriculture at Guelph, Ont., we arranged for a quantity of the seed of the True Dwarf Essex Rape with a grower of Essex County, England. Every year since then we have had our seed from the same Source. We pay a good price for it. We can buy it for a good deal less elsewhere, but it has always given satisfaction and has stood the test. For this reason we are not able to make always as low a price on Dwarf Essex Rape as some of our competitors, but while many other houses have had trouble with their Rape Seed, ours has always been satisfactory and proven true to name. We are led to make this statement from the fact that many in seeing or sending for our price cannot understand why our prices, so low on most everything, are sometimes higher on. Dwarf Essex Rape. A few cents extra per acre may make a GOOD MANY DOLLARS DIFFERENCE IN THE CROP.

DWARF ESSEX RAPE."-Do They Like it?" From a Photograph taken at the Minnesota State Farm.

DWARF ESSEX RAPE is an annual, bearing a close resemblance in leat and stalk to the rutabaga, but both leaves and stalk to the rutabaga, but both leaves and stalk are more numerous in the Rape plant, and of a taller habit of growth. It is a pasture plant which may be caten off by any kind of live stock, but it is preeminently fitted to furnish pasture for sheep and swine. A good crop will furnish at least 12 tons of green food peracre and its nutritive value is nearly twice that of clover. One acre of well grown Rape will furnish pasture for ten to twenty head of sheep for two months, and in that time it will fatten them in good form for the market, Dwarf Essex Rape thrives best on a good soil, rich in vegetable matter. Slough lands are excellent.

This plant may be grown successfully

cellent.

This plant may be grown successfully in the following ways, viz: 1. In the early spring to provide pasture for sheep and swine. 2. In June or July on well prepared land to provide pasture for sheep. 3. Along with grain, using 2 lbs. of seed per acre to provide pasture for sheep after harvest. 4. Along with peas, oats, clover seed, to provide pasture for sheep, and to get a "catch" of clover. 5. Along with corn drilled in broadcast to oats, clover seed, to provide pasture for sheep, and to get a "catch" of clover. 5. Along with corn drilled in broadcast to provide pasture for sheep. 6. In corn, sowing the seed with the last cultivation given to the corn. 7. Along with rye sown in August in sheep pasture. When rape is sown broadcast, 5 lbs. of seed per acre will suffice. When sown in rows, say, is now being

30 inches apart, and cultivated, from 1 to 2 lbs. will be enough. It is now being grown in the Northern and Middle States from the Atlantic to the Pacific. The day is not far distant when it will be grown extensively as a pasture for Swine in all the Northwest. Millions of sheep and lambs will be fattened on it in the United States. Our stock is the true Dwarf Essex, imported by us direct from Essex' County, England. Several other varieties are sold but they have not proven satisfactory. Price, lb., 30e, postpaid; by exp. or frg., lb., 20e; 10 lbs., @ 15e; 100 lbs. @ 12e; 500 lbs., @ 11e.

SORGHUM.

EARLY MINNESOTA SUGAR CANE. A much Neglected, a Highly Valuable Plant, Notwithstanding its great adaptability as a food for live stock, it is only quite recently that the real value of Sorghum (or sugar cane) has attracted general attention. In the Northwest, its great merit is not at all appreciated, and we wish to call the attention of farmers everywhere to the great value of Sorghum as a passure and fodder crop, and to the particular advantage to be gained in using our Selected Minnesota grown Seed in place of any other kind. Sorghum may be made to furnish the principal provender for Cattle, Horses and Mules from August until the following spring. As a summer pasture for Sheep, a wide field is likely to be opened up for it. As a soiling food for Swine it is most excellent, and the seed furnishes a splendid food for fowls. It can be profitably grown everywhere, from the extreme north to the extreme south, and on any ground adapted to the growth of corn. It grows right along through the severest and most prolonged droughts, so that a good yield may be expected from suitable soils in any seasons after the plants have secured a good start.

AS PASTURE. It is grown with excellent results, and springs up quickly after being fed or cut. Care, however, should be exercised in feeding it green, for while some growers state that no ill results follows its free use, others claim that, like clover, it will produce bloating.

AS FODDER. It beats everything. One correspondent writes us: "For winter feed, the most economical thing we know of. We have taken off 37 full loads (about 50 tons) of half-cured fodder to the acre." When fed as a whole ration it has a tendency to whiten the milk, but not the butter, as does Corn.

About thirty pounds of seed is required to the acre. Use a wheat drill set to one bushel. Stop every other hole. When the plants are about 8 inches high, harrow with a heavy two-horse harrow.

For soiling, it may be cut as needed For fodder, cut soon after the bloom comes out on the heads, leave for two or

included.

SOUTHERN GROWN CANE SEED. Please bear in mind that our MINNESOTA GROWN AMBER CANE is from two to three weeks earlier than Southern Cane. Where Farly Maturing Cane is not particularly desired, Southern Seed may be satisfactorily used. This we offer as follows: Amber Cane (Southern Grown), Ib., 15°, postpaid, by express or freight, Ib., 6c; 10 lbs., @ 4c; 100 lbs., @ 3c; 500 lbs., @ 2¾c; bags included.

Orange Cane (Southern Grown), Ib., 15°; postpaid, by express or freight, Ib., 6c; 10 lbs., @ 4c; 100 lbs., @ 3c; 500 lbs., @ 2¾c, bags included.

Early Minnesota Amber Cane.

FIELD PEAS

Prices Subject to Market Fluctuations.

a Trad-Twelve years ago we were severely criticised by one of the leading agricultural papers of Minnesota, as well as by many farmers, for advocating the use of Field Feas in the Northwest, Since that time we have had the pleasure of seeing the paper in question become one of the most carnest and effective advocates of their largely increased use, and the still greater satisfaction of knowing that they have become a standard crop in many parts of the West and Northwest. They should, however, be grown even more largely than they are, the who have not grown them should do so by all means. Those who have tried them and been unsuccessful should try them again. They are a highly valuable crop.

By express or freight, qt., 20c; peck, 40c; but, \$2.00, 20cd.

Bags free.

Large White Marrowfat. Seeds White. Height 4 to 4½ ft. Foliage heavy, pods large. A standard field variety; table quality fair. Qt., 30c, postpaid. By express or freight, qt., 15c; peck, 60c; bu., \$2.00, 10 bu. at \$1.60. Bags free.

Black Eye Marrowfat. Height 4 to 4½ ft. Seeds white with black eye; very hardy. Qt., 30c, postpaid. By express or freight, peck, 60c; bu., \$2.00; 10 bu at \$1.60. Bags free.

VETCHES.

VETCHES.

Sand Vetch (Vicia Villosa). Sometimes called the Hairy Vetch. This has proven to be the most valuable of all the Vetches. It succeeds well on nearly all soils, and thrives surprisingly on poor light land, and well withstands great extremes of drought, heat and cold. It may be sown either in the spring or fall, usually with Rye. It grows rapidly and soon attains a height of 3 to 4 feet. It may be cut twice for fodder. It is particularly valuable in those sections where clover does not thrive. In the North it remains green all winter under the snow, and is invaluable for early pasturing or soiling. If is valuable as a fertilizer, being a great nitrogen gatherer. For hay, cut when commencing to pod. Fifty pounds of seed required to the acre. Large pkt., 5c; lb., 20c, postpaid. By freight, lb., 10c; 10 lbs. at 8c; 50 lbs. at 6c; 100 lbs. at 5c. Bags free.

Spring Vetches. Used for the same purposes as the Sand Vetch, but will not thrive on as poor soil, or withstand extremes of weather as successfully. Large pkt., 5c; lb., 18c, postpaid. By freight, lb., 10c; 10 lbs. at 6c; 50 lbs. at 5c; 100 lbs. at 4c, Bags free.

Kidney Vetch or Sand Clover. Perennial. Valuable for dry sands and poor soil. Eaten with avidity by sheep, cattle and horses. Produces abundant hay. Sow 25 lbs of seed to acre. Pkt. 5c; lb., 35c, postpaid; 100 lbs. at 15c. Bags free.

Sand Vetch

MISGELLANEOUS FODDER AND FORAGE SEEDS.

If Wanted by Mail add 10 cents per pound for Postage.

AUSTRALIAN SALT BUSH. The many thousands of acres of alkali lands of the West may be made productive and profitable by planting Salt Bush. Cattle, Horses, Sheep and Swine eat it and thrive on it. This plant is not an experiment, it is a demonstrated SUCCESS. It was introduced into this country by the University of California, and already has proven a boon to stock raisers on the California ranges. It flourishes where grasses and other forage plants will not grow, and furnishes enormous quantities of nutritive food for stock, and remains green all winter. Single plants grown on the worst alkalilands have reached a diameter of 16 feet in one season. It succeeds everywhere, and there seems to be no question but that it will in time eliminate alkali from the ground, rendering it suitable for other crops. Prof. Tower states that its nutritious strength is nearly equal to that of Alfalfa. Large pkt., 10c; lb., \$1.75.

Test Australian Salt Bush this Season. One pound of seed will plant an acre. Sow after the past. Mix the seed with ten times its bulk of loam, sand or land plaster, and sow broadcast, after which cover lightly with a brush harrow or roll lightly. The seed germinates quickly, and the plants will soon take possession of the ground. Or the seed may be sown in a hot-bed, cold-frame, seed-boxes, or in a protected garden-bed, and the seedlings transplanted when two inches high, 7 to 8 feet apart. If the weather is dry when planting, supply a little water to each plant. Large package, 10c; ½ pound, 60c; 1 pound, \$1.75 by mail postpaid. Deduct 10e pound if wanted by express or freight.

Although our own test showed good growth, we had nine complaints from customers to whom we sold Australian Salt Bush last season, that it did not germinate. We referred these complaints to the collector who furnished us the seed, and he states that without doubt the fault lay in covering the seed too deeply. He writes: "Advise your customers to prepare the ground thoroughly and cover the seed very lightly, and you may also say to them that Australian Salt Bush is a splendid success."

THOUSAND HEADED KALE. We wish to call attention to Thousand Headed Kale as a valuable pasturage for crop of wholesome and nutritio s food. It produces more food to the acre than any other, and sheep especially thrive wonderfully upon it. So far as we know, it has not been used in this country, but we do not heshate to predict that in a few years it will be as popular as Dwarf Essex Rape. It is in England thoroughly established as a safe and profitable pasturage for sheep. The seed should be drilled in rows 26 to 30 inches apart, and plants thinned out so as to stand about 20 inches apart in the row, or the seed may be broadcasted, using 1½ lbs. to the acre. Large pkt., 10c; ½ lb., 30c; lb., \$1.00. postpaid.

GRASS AND CLOVER SEEDS.

We have adopted the above design as our Trademark, and for the protection of ourselves and our customers, have caused it and the word STERLING as applied to Seeds to be registered in the Patent Office at Washington.

QUALITY.

We ask special consideration of the QUALITY of our Grass, Clover and Millet Seed. It may not be generally known that Northern Minnesota and Wisconsin grown Timothy and Clover Seed ranks the highest of any produced in the United States, and commands the highest price in the markets of this country and Europe. We have the best cleaning machinery obtainable, and exercise every care to assure a high degree of purity and germination. Any one who orders our best grades of Grass, Clover and Milet Seeds, may exercise the privilege of returning them at our expense if upon arrival and prompt test they do not develop a high percentage of growth, or fail to prove of satisfactory purity under microscopic examination.

MR. O. C. GREGG Superintendent of Minnesota State Farmers'
Institute,

Lynd, Lyon Co., Minn., Dec. 10, 1897.

Institute,

Lynd, Lyon Co., Minn., Dec. 10, 1597.

NORTHRUP, KING & Co.,

Minneapolis, Minn.

GENTLEMEN;—We purchased of you last spring some of your Grass Seeds, sold under the "Sterling brand." We made selections of them because we were assured that they were free from foul seeds, and had strong germinating power.

Our experience with them verified the recommendation you gave.

One of the dangers which grows out of the sowing of grass seed is that we are liable to get injurious weed seeds in such sowing. We had an experience with some in which we obtained the seed of the ox-eyed daisy, and had to watch very closely in order to exterminate the little start which we then gave to that pest upon our place. The Seedsman who will furnish seeds of good vitality, as well as free from noxious weeds, is a valuable aid to good agriculture. We believe that your house proposes to maintain and further establish that reputation for HIGH GRADE SEEDS that is needed in our Northwest.

I am, very truly yours,

O. C. GREGG.

OUR "STERLING" BRANDS.

The terms FANCY. CHOICE and PRIME by which the best grades of Timothy and Clover Seeds are usually known, vary greatly in different markets, and have been me much abused by many seedsmen, who apply these terms indiscriminately to any grade of seed. For this reason we have established a grade of our own called STERLING, and we intend this grade to represent the best seeds possible to send out, both as respects PURITY and GERMINATING POWER We shall continue to sell Choice and Prime Grades, and they will be found Exactly as Represented, but the cost of using the best seed is so little more, that we urge purchasers to buy our STFRLING BRANNS, and secure the best quality. The results will pay the difference many times over.

PRICES.

Prices on Grass Seeds, Clovers, etc., are very fluctuating. Those herein given are based on values the day this is written. So we reserve the right to send seed to the value of the money sent us, according as the market is higher or lower. If large quantities are wanted, it is always best to write for prices. Then there is sure to be no misunderstanding. Unless otherwise stated, our prices include Sacks, and free delivery to any railroad station in Minneapolis.

If any Grass or Clover Seeds are wanted by mail, add 10c per pound for postage,

Please note that we quote both by the 100 LBS, and BUSHEL.
In ordering, always state Grade wanted. 20 lbs., or more, supplied at the 100 lbs. rate.

CHAS. WELCOME, Pratt, Wis.

CLOVERS.

New Brighton, Minn.,
Nov 1st, 1897,
NORTHRUP, KING & CO.,
Minneapolis, Minn.
Gentlemen: "The Seeds I have had from you while
Manager of hr. J. J. Hill's
North Oaks Farm, have been
weet satisfacture.

Manager of Mr. J. J. Hill's North Oaks Farm, have been most satisfactory. I wish to highly commend, Yon's Sterling Grades of Grass and Clover boeds of which we used a large quantity. Farmers could well afford to pay three times as much for seeds as pure, as cleen, as strong growing as these, than to take the ordinary grades as a gift. I wish also to speak of your Minnesota King Corn. It is a grand variety, early, a heavy yielder and an excellent sidge sort.

Yon's very truly,
J. E. STORY.

MR. J. E. STORY.

Mr. Story has a great record as a farmer. As a young man, he won the Gold Medal, awarded by the 'ounties of Lannark and Carleton, for the best farm in these counties. He was then made Superintendent of the Government Experiment Station of Ontario, Canada, from there, went as manager of the celebrated "Bow Paik" farm, the "crack" farm of Canada, which position he held until he came to Minnesota to take charge of Mr. J. J. Hill's farm at White Bear Lake.

Bear in mind that prices on grass and clover seeds fluctuate greatly. It is always best to write for prices. If wanted by mail, add 10 cents a pound for postage. In ordering, always state Grade Wanted. 20 lbs., or more supplied at the 100 lb.

AUSTRIAN BROME GRASS.—(Bromus Inermus.)

This is the most promising grass that has yet been tried on the prairies of the West. It is very hardy, endures very low temperature in winter, and possesses great power to grow in dry climates. It is well adapted for hay or pasture. This grass comes up quickly in the Spring, makes a rapid growth, and after it has been cut for hay, makes abundant pasturage.

Prof. Shaw says: "This grass cannot be obtained too soon by the farmers of the Northwest."

We wish to call special attention to the quality of our seed. The large demand for this seed has resulted in a great deal of trashy, light seed being

We offer two grades of this seed "Sterling" and Regular. Our "Sterling" grade is the finest obtainable, the best and heaviest we have ever seen. By mail, postpaid, lb., 35c; by express or freight, lb., 25c; 100 lbs., \$20.00. 15 lbs. to the acre.

Regular. Is good seed but lighter, and does not show as good a test. It is fully equal, however, to the seed usually sold. By mail, postpaid, 30c; By express or freight, lb., 20c; 100 lbs., \$16.00. 20 lbs. to one acre.

Austrian Brome Grass.

Crookston, Minn., Dec. 1st, 1897.

NORTHRUP, KING & CO.,

Minneapolis, Minn.

Gentlemen:-The Bromus Inermus ranks among the most promising of the grasses on the

experiment plots here. The yield this year was very large. I shall be greatly surprised if this species does not in the future figure among the most prominent grasses of the Northwest. Yours truly, T. A. HOVERSTAD,

Supt. Experiment Farm.

Morthrup, King & Co's Clover Grass Mixtures.

FOR MEADOWS AND PERMANENT PASTURES.

MR. A. H. POEHLER; Treas, H. Poehler Co., Grain Commission Merchants, Minneapolis

All authorities agree that for PASTURE and HAY, best results are obtained from the use of grass seeds IN MIX-TURE, The reasons are obvious: First-A NUMBER OF SPE-CIES will insure a much DENSER GROWTH than the same number of seeds of one or two species, and prove Less Exhausting to the soil, since they live to a large extent on different constituents. Second-Seasons that affect some grasses adversely are FAVORABLE to other sorts; so that with mixtures, a failure is PRACTICALLY IMPOSSIBLE, provided, of course, the seed is good, We take great pains in selecting grass seeds, in order to secure the HIGHEST GERMINATION, and mixtures are based on a full appreciation of the requirements of different soils for which they are intended.

MR. J. STRUDWICK, Supt. Mr. F. H. Peavey's Highcroft Farm.

"The permanent pasture mixtures you made up last Spring for forty acres of our Renville County farm made an excellent catch and is very thick on the ground. Although the original cost is greater, I believe that such mixtures as these are, in the long run, VERY MUCH MORE ECONOMICAL and PROFITABLE than the VARI-ETIES ORDINARILY USED FOR PASTURES in the North-Yours truly,

H. POEHLER COMPANY

N., K. & CO.'S CLOVER GRASS MIXTURES .- We ask purchasers to observe that we are able to offer, at these very low figures, only from the fact that we make up large quantities before the commencement of the season, therefore nothing can be taken out. We cannot afford to add anything to the mixture, on account of the slight margin upon which we have figured. We shall be happy, however, to make estimates on any special mixtures desired by our patrons. Our recommendations for quantity to the acre is fixed on the basis of good fair seeding. The quantity can, of course, be spread over more or less ground, as the case may demand. 25 lbs. supplied at the 100 lb. price.

The permanent pasture mixture you made up for Mr. Peavey's Highcroft Farm has done splendidly. It was a fine mixture and made a good catch.

During the sixteen years I have been in this country I have been trying to get such mixtures as are so successful and permanent in England. Yours is by all means the best I have yet seen.

Yours truly J. STRUDWICK. Wayzata, Minn.

The above are mixtures we can "stand by." We can make up lower priced mixtures if desired. Don't let the price stand in the way of your getting a good article. It is the cheap, fake grass mixtures that have brought discredit on grass and clover mixtures in this country.

PRICES SUBJECT TO MARKET CHANGES.

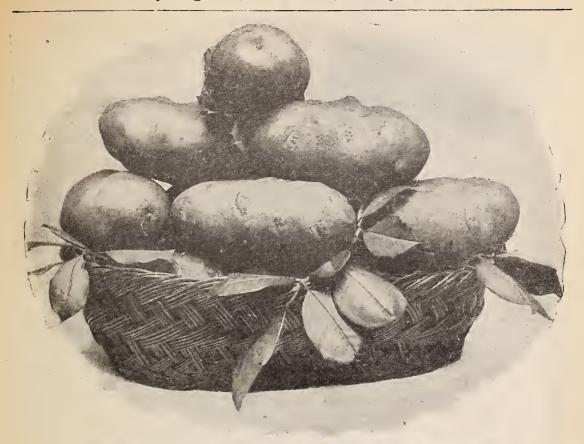

The name by which we have designated this Millet has been applied to emphasize the use to which it is now being largely put, as an economical and highly valuable food for stock, especially Hogs, and while it is one of the best varieties to grow on account of the ready sale with which the seed now meets in most millet markets, for Bird Seed and other commercial purposes it is

as to the profitable raising of swine. Lb., 20c, postpaid; peck, 35c; bu., \$1.00; 10 bu. at 90c.

N., K. & CO.'S GOLDEN WONDER MILLET. Heads eighteen inches in length containing 18,000 seeds are not rare. The average length of head is about fifteen inches. The yield is enormous. The stalk at butt measures about one-fourth of an inch, full of broad leaves, resembling those of corn, yielding 10 to 12 tons of fodder per acre, and as easily cured as clover hay. Lb., 20c, postpaid; peck, 75c; bu., \$2.00.

GERMAN MILLET. Those who grow Millet for hay will find the Southern grown German Millet the best variety for that purpose on account of its giving a ranker yet finer growth than the Northern grown Millets. Peck, 35c; bu., \$1; 10 bu. @ 90c. COMMON MILLET. Requires a dry, light, rich soil, and grows 2% to 4 feet high, with a fine bulk of stalks and leaves, and is excellent for forage. For hay, sow broadcast, one-half bushel per acre, from May 1st to Aug. 1st. For grain, sow in drills, one peck to the acre, and not later than June 20th. Peck, 30c; bu., 80c; 10 bu. @ 75c.

HUNGARIAN. A dark seeded variety, resembling in growth the German Millet, but being less rank, and possessing finer stalks. Peck, 35c; bu., \$1.00; 10 bu. @ 90c.

NORTHRUP, KING & CO.'S EXTRA EARLY OHIO POTATOES.

EXTRA EARLY OHIO POTATOES. Northrup, King & Co.'s Special Stock. We consider these to be the earliest, purest and altogether the handsomest stock of Early Ohio Potatoes to be found anywhere. On these points, we challenge comparison with stock from any other source. We do not admit that its equal exists among Early Ohio Potatoes. They are grown under conditions that make them cost more than common stock, they are selected with the utmost care, and the result is grand, such as to delight everyone who knows and appreciates a good potato. Everyone of them is a "picture" of what an Early Ohio Potato should be. Stock Limited, 100 eyes, by mail, postpaid 80c; by freight, peck 50c bu., \$1.50; bbl., \$4.00.

EARLY OHIO. We do not now grow our Early Ohio Potatoes. Minneapolis is such a large seed potato receiving market and shipping point that we have found it to be a better plan to select each year, a few carloads of Ohios out of the many coming each day during the fall and early winter. In this way we have our pick out of many thousands of bushels, and we usually have better stock, than if we felt obliged to first dispose of those of our own growth. Our stock will please the buyer.

100 eyes, by mail, postpaid, 60c; peck, 35c; bu., \$1.10; bbl., \$3.00.

EXTRA EARLY TRIUMPH,--(Bliss.)

10 bbl. lots, @ \$4.00.

POTATO EYES BY MAIL

This special collection of 25 eyes each of N. K. & Co.'s Extra Early Ohio, Extra Early Triumph, Carman No. 3 and N. K. & CO.'s PINGREE, will enable all who wish to secure the genuine stock of these four grand varieties, to secure same at very slight expense, and without freight charges. Remember that we warrant them to reach the purchaser in good growing condition, and that they will keep so until planting time. PRICE, by mail postpaid \$1.00.

See Last Cover Page.

risk. Formonths,

POTATO SEED.

A very interesting employment is that of growing new sorts of Potatoes from the seed. A small package of the true hybridized seed will produce a number of seedlings differing greatly in shape, color and other general characteristics. The tubers rarely grow to be more than half an inch in diameter the first year, and while their value can be judged somewhat the second year, it is not until the third year that their comparative worth can be truly determined. At that time it will be strange indeed if among them is not found at least one or two that will well reward all the effort that has been expended on them. In this way have been obtained our choicest and rarest varieties. The seed should be planted in fairly rich soil about corn planting time. Keep clear of weeds and give good cultivation. Pkt., 20c.

NORTHERN GROWN SEED POTATOES.

No potatoes grown can be compared with those produced in the North, either for VIGOR and FREEDOM FROM DISEASE, or PRODUCING AND LONG KEEPING QUALITIES. Our stock is so fine, and our prices so low that it is a particularly favorable time to get into a stock of some of the newer and better sorts.

SHIPMENT will be made at any date ordered, but where no special instructions to the contrary are given, will hold until in our judgment there will be no danger from freezing. Write for special prices on carload or large lots.

EXTRA EARLY VARIETIES.

LATRA LARGI VARIETIES

Zinnia, Choice double mixed....

Evening Scented Stock.

While the flower is pretty, its great charm lies in the sweet and powerful perfume it emits in the evening, when the flower opens, [See description.]

FLOWER LOVERS everywhere will be glad to know something of the work that is being done by the Woman's Improvement League of Minneapolis toward interesting the children of the Public Schools of the city in the culture of flowers. In 1893, the Ladies' Improvement League distributed among the children of the various schools several thousand packages of flower seeds which we supplied. Handsome pictures which were to be donated to the schools attended by the successful competitors were offered as prizes. The children took up the work with great enthusiasm, and the interest kindled has grown year after year, until the spring of 1897, when we furnished the Flower Committee with ten thousand packages of seeds made up of the handsomest and most easily grown varieties. A systematic inspection of each little garden showed results which were almost beyond belief. The mixture refered to was made up especially for the purpose, and has proven so successful that we decided to offer it for sale. We have called it Northrup, King & Co.'s School Garden Nixture. It is made up of most beautiful, interesting and easily grown annual varieties. Package (containing enough seed, when transplanted, or a bed 30 feet square) at the low price of 10c; 4 pkts, 30c. Full directions are printed on each package.

We Will Make Low Prices to any Public School (City or Country) Wishing to Buy this Mixture in Quantity.

This mixture should be popular with everyone. Even practiced floriculturists will find much to interest and surprise them, in the variety and beauty of the flowers, while children are simply delighted, and can scarcely wait until the flowers are unfolded, in their anxiety to see what it is "going to be."

The following statement from Prof. Chas. M. Jordan, Supt. of Public Schools, Minneapolis, and that of Mrs. Barnard, Chairman of Flower Committee of the Minneapolis Improvement League, under whose auspices the seeds were distributed, show the interest taken in the work, and the satisfaction our School Garden Mixture has given.

...... Minneapolis Public Schools, Monday, Wednesday and Friday, 4 to 6 P. M. CHAS. M. JORDAN, Supt. Saturday, 8:30 to 9:30 A. M. MINNEAPOLIS, Nov. 1st, 1897.

MINNEAPOLIS, Nov. 1st, 1897.

Cor. Hennepin Ave. & 1st St... City.

Gentlemen: I desire to express the obligations under which the public schools of this city are to your firm for the interest you have shown in the flower work organized among the pupils of the public schools by the Woman's Improvement League. This movement has already accompilshed a great work. It has interested thousands of the school children in the cultitativation of flowers, and has done a great deal toward beautifying the city. Plany an unsightly yard has been transformed into a beautiful flower garden by means of the flower seeds which were generously contributed by Northrup, King & Co. These seeds, so far as I have been able to observe, "always grow."

NORTHRUP, KING & Co., City,

Kind Sirs: Please accept sincere and hearty thanks from the Minneapolis Improvement League for your generous gift of seeds for nine thousand children. I wish to express the highest praise for the "School Garden Mixture," as it has yielded in many cases wonderful results. I wish that I had accomplished my purpose last year and taken photographs of some of the little gardens. As high as One Hundred and Fifty Plants have been reported from some of the packets. Many of the gardens were most beautiful. Respectfully

MILDRED M. BARNARD,

Chairman Flower Committee

Minneapolis Improvement League.
Minneapolis, May 1st, 1897.

Our checks for the amount due the prize winners will be forwarded as soon after Nov. 1st as the decision can be made. The names and (if possible) the pictures of successful competitors will be given in our catalogue for 1899. While all cannot win the cash prizes, everyone who purchases a package of the School Garden Mixture will feel amply repaid for their investment in the beauty and variety of flowers they secure.

"The School Garden Mixture is a good one."

A. Bedford

SUMMER FLOWERING BULBS FOR SPRING PLANTING.

For this list we have selected those bulbs, which while inexpensive are most beautiful and most easily grown. Their culture is simple, and most of them flower the first summer. The bulbs may be kept over winter and will continue to multiply, year after year. A small investment in any of these bulbs will well repay the purchaser.

PLEASE NOTE CAREFULLY. All bulbs and roots will be sent by mail or express, charges prepaid, when ordered at single or dozen rates. At the 100 rate they will be sent by express or freight, the purchaser paying the charges, unless otherwise stated. Not less than six of any one variety supplied at dozen rates, and not less than 25 at the 100 rate. Orders with money should be sent us as early as possibe, and they will be filled in rotation. Bulbs subject to injury by frost will not be sent until such danger is over.

LILIES.

CULTURE. Plant as soon as frost is out of the ground, in fine rich soil, mixed with sand. Set the bulbs from 3 to 5 inches deep, according to size. No water should be allowed to stand around the roots. Once firmly established, they will stand for years.

Lillium Auraum. (The Golden-Rayed Lily of Japan). Flowers are immense, 10 to 12 inches across, very fragrant, color ivory-white, studded with crimson spots and a bright golden band through the center of each petal. Bulbs 15e; 2 for 25e; doz., \$1.30.

Gladiolus.

Lilium Rubrum. The famous "Ruby Lily" of Japan. It would be difficult to exaggerate the beauty of this glorious lily. The six broad petals dotted with carmine spots. Very fragrant. Bulbs 15c each, 2 for 25c; doz., \$1.36.

Lilium Album. Pure white, very fragrant. Bulbs, 20c each, 3 for 50c;

Lilium Album. Pure white, very fragrant. Bulbs, 20c each, 3 for 30c; 7 for \$1.00.
Lilium Longiflorum. The pure white flowers resemble the well known Bermuda Easter Lily and are very fragrant. 15c each 2 for 25c; doz. \$1.25.
Lilium Tigrinum, Splendens (Improved Single Tiger Lily). Has very large flowers of excellent form; color, orange-salmon with dark spots. 15c each, 2 for 25c; doz., \$1.25.
Lilium Tigrinum, flore pleno, (Double Tiger Lily). This magnificent lily is of stately habit, bearing clusters of very large double flowers on tail, strong stems; color, bright orange-red, spotted with black. 15c each, 2 for 25c; doz., \$1.25.

Jacobean Lily (Amaryllis Formosissima). The brilliant deep scarlet flowers are often eight inches across and in purity and brilliancy of color are unsurpassed. 15c each, 2 for 25c; doz., \$1.25.

GLADIOLUS.

On account of its intrinsic merit alone, the Gladiolus is entitled to the high rank it holds among flowers; but when is considered, also, how easy Is its culture, and for what a small sum a splendid assortment can be secured, it seems a matter of surprise that they are not found around every home. The flower is most beautiful and lasting, and the infinite variety of color and marking render their cultivation

of surprise that they are not found around every nome. The flower is most beautiful and lasting, and the infinite variety of color and marking render their cultivation very interesting.

CULTURE. They thrive in almost any good soil, except a stiff clay, require full sunlight, and are only liable to injury from rank manure. Plant the bulbs six to nine inches apart, the large ones four inches and the small ones two inches deep. Make an early planting of the smallest bulbs first as soon as the ground is sufficiently dry and warm. Continue to plant at intervals of two weeks during the spring and early summer; in this way a succession of bloom may be had from midsummer until frost. In autumn, before freezing they should be dug and dried the earth and old bulbs removed, and then stored in a cool dry place, secure from frost until spring.

N. K. & Co.'s Imperial Gladiolus Mixture. Those who have had this mixture know it to be a grand one. For many years we have been adding to it from the new and high priced varieties as they made their appearance, and we mean it to include every desirable sort. It has been our experience that comparatively few people try the named varieties. So we have made a specialty of our Imperial mixture and the plan adopted in their growth by which they are cultivated much like potatoes or corn enables us to offer them at a price ridiculously low compared with what is asked for them ordinarily. At these prices they should go like hot cakes. 4 for 10c; doz., 25e; per 100 \$1.30, postpaid; by express or freight, per 100, 90c.

Gladiolus Mixtures.

These mixtures must not be confounded with the common mixed sorts. We recommend this stock with perfect confidence, as it is composed only of choice varieties. Single and doz, prices include postage. The 100 rate ls by express at purchasers

Shades of pink mixed each, 3c; doz., 30c; 100, \$1.75.

Shades of red mixed, each, 3c; doz., 20c; 100, \$1.00.

Shades of Yellow mixed, each, 4c; doz., 40c; 100, \$2.50.

White and light varieties, each, 4c; doz., 40c; 100, \$2.50.

Striped and variegated mixed, each, 4c; doz., 40c; 100, \$2.50.

Lemoine's Butterfly (large strained) varieties mixed, each. 4c; doz., 40c; 100, \$2.50.

Golden Rayed Lily of Japan.

GLADIOLUS SEED.

One of the most interesting branches of Gladiolus culture is the growing of bulbs from the seed. No skill or special care is required, and in the course of two or three years flowering bulbs will be secured. It is not only a very interesting and inexpensive way of securing a fine stock of bulbs, but there is almost sure to be found new sorts that are the results of hybridization and which could not be secured in any other way. Our seed is from the finest flowers and embrace hundreds of markings and colors. Gladiolus seed, pkt., 10c; oz., 25c, postpaid.

DAHLIAS. The extraordinary beauty of the new varieties of Dahlias that have been recently added to the already large and wonderfully varied list, have renewed the old time interest in this majestic flower. Certainly no flower is more worthy of special attention. Our assortments comprise all the positive colors, in most striking shades.

CULTURE. A good mellow soil, thoroughly enriched with well-rotted manure, and an abundance of water upon the plants as well as at the roots during dry hot weather, is the secret of success. Water overhead daily or oftener in hot weather, Splendid flowers in the hottest, dryest season is the result. The tubers should not be put into the ground until settled weather, say May 20. Will book orders anytime, but will not fill until about May 1.

begonias. (Fuerous Rooted). The flowers are very large and briliantly colored, embracing every shade of pink, rose, white, scarlet, yellow and orange. Planted out-doors they present a dazzling show until killed by frost. Single: Scarlet, Orange, Pink, White, Yellow and Crimson. Each, 10c; doz., \$1.00. Double: Scarlet, Orange, Pink, White, Yellow and Crimson. Each, 25c; doz., \$2.50.

BEGONIA CULTURE. For growing in pots or boxes in the house, plant in rich, sandy soil, give good drainage and water freely after the leaves start, but do not let the soil become sour from over watering. If it is desired to have a bed outdoors, select a shady, moist situation, making the bed rich with thoroughly rotted manure and leaf mold, if obtainable. Plant as soon as danger from frost is over. After the plants start into vigorous growth keep well watered.

start into vigorous growth, keep well watered.

LILY OF THE VALLEY. These beautiful flowers which are equally adapted for conservatory, the parlor or for out-door planting, are so fragrant, so prolific and so easily pro-duced, that they should be found in every garden. Planted out doors they blossom early in the spring, multiply rapidly, will reappear every year, are perfectly hardy and need no protection.

CULTURE. Lily of the Valley pips should be set in a moist shaded situation.

Best Berlin Pips. Doz., 25c; per 100, \$1.50, postpaid. Write for price on lots of 500 and upward.

TUBEROSE, Double Dwarf Excelsior Pearl. The flowers of the Double Dwarf Pearl are larger, and more numerous than in the common type. They are so fragrant that they perfume the atmosphere for some distance around.

CULTURE. Fill five inch pots half full with cow manure and on top of this good rich earth mixed with sand. When the weather is warm the pots may be set out-doors in earth. At the approach of cold weather the pots may be lifted from the earth and brought indoors.

TUBEROSE. DOUBLE DWARF EXCELSIOR PEARL (Choice Bulbs). Each 3c; doz., 28c; 100, \$2.00, postage paid. By express at purchasers expense, 100, \$1.25; 500 @ 90c.

VARIEGATED LEAF TUBEROSE, This is an early single kind with striped foliage. Each 7c; doz., 80c.

ALBINO. Flowers single, star shaped, pure white. Each 8c; doz., 85c.

CALADIUM ESCULENTUM. (Elephant Ears). A striking foliage plant. Leaves very large, often three to four feet long and nearly as wide. Very effective on lawns. Each 15c; doz., \$1.40. Extra large bulbs, each, 22c; doz., \$2.35 postpaid

CULTURE. Plant in rich soil and water freely.

OXALIS. Blossoms throughout the summer and Fall. Foliage graceful and pleasing. White and rose pink. Doz., 8c; 100, 34c, postpaid.

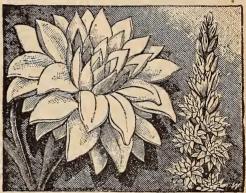

GLOXINIA. Magnificent. Will bloom in six weeks from the planting of the dry bulb. Their splendid trumpet shaped flowers are exquisitely tinted, blotched or tigered with minute dots of volet, pink or crimson. Bulbs, each, 18c; 3 for 50c. Seed, per packet of 100 seeds, 12c. Will bloom in three months from seed.

MADERIA VINE. (Mignonette Vine). A climber with glossy green leaves. Flowers white and fragrant. Grows very rapidly and will cover the side of a small house in a single season. Each, 7c; 3 for 15c; doz., 50c, postpaid.

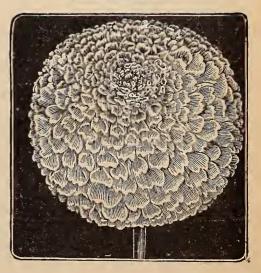

CINNAMON VINE. A climber that grows very rapidly. Foliage bright and lively. Each, 7c; 3 for 15c; doz., 50c, postpaid.

Lily of the Valley.

Dahlia.

IS YOUR LAWN FADING?

ARE THE GRASSES DYING?

If so, Do not Disfigure Your Lawn, Offend Your Senses, or Fill Your Ground with Weed Seeds by using Stable Manure, but apply EXCELSIOR LAWN DRESSING. EASILY APPLIED. NON-ODOROUS.

N. K. & GO.'S EXCELSIOR LAWN DRESSING. Is a fertilizer especially prepared for LAWNS. It possesses in best calculated to NOURISH THE GRASS, promote its LUXURIANT GROWTH, and the DAKK GREEN COLOR so greatly admired. It is not only the MOST PERFECT LAWN DRESSING that has been devised, but it is the most pleasant to handle, being NON-ODOROUS, so that its liberal use on a lawn cannot be detected by any unpleasant odor. Being dry and fine it is EASY TO APPLY, and imparts such a VIGOR-OUS GROWTH to the grass that two or three applications during the Season at the rate of one pound to each 100 square feet of I lawn keeps the grass in Boarishing condition throughout the s ason, and enables it to withstand the effect of the hot summer sun. We prepare but one kind of Lawn Dressing. This we do not believe can be excelled. It is put up in bags containing our brand. By express or freight, bag of 10 pounds, 75c; 25 lbs., \$1.50; 50 lbs., \$2.50; 100 lbs., \$4.50.

How to Apply the Excelsior Lawn Dressing.

The first application should be made early in the spring as soon as the frost is out of the ground. Care should be taken to scatter it evenly over the lawn, sowing it by hand. The first application should be made at the rate of 10 to 15 pounds fertilizer to every 1,000 square feet of lawn surface. If at any time afterwards it be noticed that the lawn is thin and light colored in spots a further application of Fertilizer will speedily restore its color. The fertilizer works best if applied just before a rain. If applied, however, when the weather is hot and dry, the application should be made early in the morning or late in the evening, and the lawn wet down freely, immediately afterwards. In seeding down a new lawn, apply broadcast, double the amount above mentioned, and rake it in thoroughly before sowing the seed.

The Use of Excelsior Lawn Dressing on Flowers.

By its judicious use, the health, vigor and free blossoming character of flowers will be greatly enhanced. The result of its use on flower beds is quickly seen by the dark green leaves and high color of blooms produced. To fertilize bedding plants, stir a teaspoonful, or more, according to the size of the plant, into the soil about each plant, and repeat two or three times during the season. After the fertilizer is used, water the plants

FOR HOUSEPLANTS, dissolve one teaspoonful of Fertilizer in one quart of water, and use the solution freely around the plants, stirring the solution while applying. It may be applied as often as the plant seems to require it; once every week or ten days until they are in the desired

Root of Grass show-ing the effect of using Excelsior Lawn Dressing.

POULTRY FOOD.

A Celebrated Artist, when asked with what he mixed his paints, replied "WITH BRAINS." Precisely so does a progressive Poultry Keeper mix his rations.

CRUSHED OYSTER SHELLS.

The most frequent cause of HENS NOT LAYING is the absence in the food of CARBONATE OF LIME. As ERUSHED OYSTER SHELL is practically pure Carbonate of Lime, it supplies, when fed to poultry, this most essential element, and greatly aids in the formation of the egg.

100 Lbs. CRYSTAI IT MAKES HENS LAY PUT UP FOR ORTHRUP KING TO Minneapolis Minu

Advantages gained by the use of Oyster Shells.

It prevents "Cholera"; It keeps the poultry healthy; It makes hens lay an egg per day; It prevents soft shell eggs; It prevents Hens from eating their eggs; It makes the egg shell strong enough to carry without breaking; It contains many essential components of the egg; It makes eggs larger and heavier.

when you buy 100 lbs. of "Peerless" Brand Crushed Oyster Shells, you get 100 lbs. of Shells, not 15 to 20 lbs. of dust and dirt mixed in, as our brand is specially cleaned.

To get best results in Poultry Raising, the use of something of the kind is positively necessary. Every poultry house or yard should have a pan or trough full, so that the fowls can have access to them at all times. Put up in 100 lb. bags, our price, bag included 90c per 100 lbs.

Our Catalogue of Poultry Supplies, is now in preparation, write for it. It will save you money.

MICA CRYSTAL GRIT.

Hens having no teeth, should be kept constantly supplied with some sharp material, to grind and masticate their food.

Mica Crystal Grit is superior to all other forms, as it is not only sharp and hard, but its properties are such that it acts as a tonic, and contributes largely to the health and productive power of the Fowl. Our price, for 100 lbs., (bag included) 90c. GROUND BONE. Per lb., 5c; per 100 lbs., \$3.00; bags free.

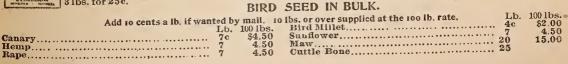

Add to cents a pound for postage if wanted by mail

We handle large quantities of Bird Seed, and can supply it either mixed or in bulk. We desire to call special attention to our Sterling brand, and to our Recleaned Canary, Hemp, Millet, Rape, etc., and to our very reasonable prices.

N. K. & CO.'s STERLING BIRD SEED.

This mixture is so vastly superior to the mixtures usually put up under the name of "Bird Seed," (much of which is simply rubbish) as to cause the Sterling Brand, to meet with a steady sale wherever it is once introduced. It is an honest package of bird seed, made up from the finest and cleanest quality of re-cleaned Sicily Canary, Russian Hemp, German Rape and Imported Millet, contains a large piece of Cuttle Bone and weighs without the package 16 ounces to the pound. It is always packed in a round box, with red wrapper and under our registered trademark. Price 10c a lb., 3 lbs. for 25c.

OUR PAMPHLET ON LAWNS

HOW TO KEEP A LAWN GREEN, HOW TO BUILD NEW LAWNS. HOW TO REPAIR OLD LAWNS.

WILL SEND IT FREE, IF REQUESTED, WITH EVERY ORDER FOR LAWN GRASS.

N., K. & Co.'s Sterling Lawn Grass. We prepare three grades of Lawn Grass Seed. which are kept constantly in stock. The best of these mixtures is N., K. & Co.'s Sterling Lawn Grass, which has been used with the greatest success on thousands of lawns. This mixture is composed of a number of varieties best adapted to the purpose. Some of the grasses are early, others medium, and still others late. By this means as soon as one variety has ceased to be at its best, others are ready to take its place. Another important point is that, by the use of many grasses, a much heavier sward is obtained, than is possible with any two or three sorts, as no matter how much of one kind of seed may be sown on a given space, it will only support so many plants. If another variety, however, is sown in connection with it, a largely additional number of plants can be maintained, as they thrive on different elements in the soil. This mixture is unequaled for tennis and croquet grounds. Our Stering, Qt., by mail, postpaid, 35c; qt., by express or freight, 25c; peck, \$1.15; bu., \$4.00, bags included. In 5 bu. lots, \$3.75 per bu.

N., K. & Co.'s Park Mixture. This is a fine mixture, the grasses used in its combination being equally as good as those in the Sterling Lawn flixture, but not containing as many varieties or some of the higher-priced sorts used in the Sterling Lawn flixture, the grasses used in the Sterling Lawn flixture, the grasses used in the Sterling Lawn flixture, but not containing as many varieties or some of the higher-priced sorts used in the Sterling Lawn flixture as the Sterling. Qt., by mail, postpaid, 25c; qt., by express, 16c; peck, 90c; bu., \$3.00.

N., K. & Co.'s Lawn Grass. Good Mixed. Where a fine lawn is wanted, we always recommend that the best seed be used. There are places, however, that are not conspicuous and where all that is desired is a good, healthy growth of grass, where a cheaper mixture will answer every purpose. No better lawn grass for the money can be obtained than our Good flixed, Qt., by mail

OFFICE OF BOARD OF PARK COMMISSIONERS.

MINNEAPOLIS, MINN

January 10th, 1897.

NORTHRUP, KING & Co., Minneapolis, Minn.

NORTHRUP, KING & Co., Minneapolis, Minn.
GENTLEMEN: During the past twelve years,
in which I have been Superintendent of Parks
of Minneapolis, our park system has been built,
and we have been obliged to seed large areas to
grass each year. It affords me great pleesure
to state that during all this time I have found
your Lawn Seed of a UNIFORMLY HIGH QUALITY,
both as respects STRONG GERMINATING POWER
and FREEDOM FROM UNDESIRABLE SEEDS, besides producing a turf of FINE TEXTURE and
GREAT DURABILITY.
Yours very truly, W. M. BERRY, Supt.

The above statement from Mr. Wm., M. Berry, for the past twelve years Superintendent of Parks of Minneapolis, and for the fifteen years immediately preceding, Supt. of South Park, Chicago, is a notable one, coming as it does from one of the most widely known and experienced Park Superintendents in the United States, and covering, as it does, twelve years continuous use of our Lawn Grass Mixtures in large quantities.

QUANTITY REQUIRED.

In order to secure quick and satisfactory results, a liberal quantity of Lawn Grass Seed should be used, as spots not seeded will surely be occupied by weeds. The usual rule is one quart for 300 square feet; four to six bushels for an acre.

"HIGHCROFT," Country Residence of Mr. F. H. Peavey.

MINNEAPOLIS, MINN., Jan. 3d, 1898.

NORTHRUP, KING & Co., Minneapolis,

Gentlemen: My Lawn at Highcroft consists of about eight acres, and was seeded with your Sterling Lawn Grass Mixture. It is a beautiful lawn, entirely satisfactory to me, and much admired by those who see it.

Yours very truly,

FRANK H. PEAVEY.

Strangers visiting Minneapolis almost invariably comment on the Beauty of its Lawns, both in the Public Parks and about the pri-vate homes. In a very large degree their fine appearance can be justly attributed to the uniform excellence of Our Lawn Grass Seed.

Single Plants, postpaid, 20c; 2 for 40c; 6 for \$1.00.

A Perfect Nuisance.

One lady said:—"The MINNEAPOLIS CLIMBER is the most beautiful vine I ever saw, but so many strangers passing by would stop to ask its name and where it could be obtained that it became a 'perfect nuisance' answering the door bell I Nevertheless, after having once grown the beautiful vine with its fragrant flowers, we could not think of having any other in its place."
